GENERAL REVIEW.

CHICAGO, December 31, 1891.

HON. WILLIAM T. BAKER, *President of the Board of Trade of the City of Chicago:*

SIR:—Herewith, I have the honor to hand you the thirty-fourth annual report of the Board of Trade of the City of Chicago.

A general diffusion of commercial benefits has marked the year 1891. Reasonable contentment of nearly all laboring classes, arising from a business activity, not spasmodic but uniform, not confined to one industry or few industries, not true of one section only but extending into every section of our country, has been a gratifying feature of the year. The wide distribution of profits derived from the business of the year immediately preceding, in a large measure explains the enterprise which has pervaded the country, giving employment at fair rates to the common laborer, the artisan and the mechanic. This distribution has also inaugurated and promoted extensive public improvements, not the least advantage of which is the employment of a floating population, whose idleness is always a menace to public tranquillity.

Added to these salutary conditions, food has been bountifully provided at moderate cost, affording at the same time a fair profit to the farmer. The basis of this national prosperity is in the enormous crops of the country. The fields of the South and the prairies of the West have yielded cotton and grain in unstinted measure. The mines have given profusely from their stores, and from rich pastures have come vast herds of cattle, sheep and hogs.

Such a domain under the influences of an enlightened and ambitious population could not be otherwise than marvelously prosperous. The conjunction of such great natural advantages with such a people is sure to result in a prosperity not elsewhere known.

The yield of the principal cereals of the year, comprising corn, wheat, oats, rye and barley, aggregated 3,518,328,000 bushels,

being greatly in excess of the yield of these cereals during 1890, and the largest ever produced in any year.

The estimated number of animals on farms at the beginning of the year, including horses, mules, milch cows, oxen and other cattle, sheep and hogs, was 169,216,813, valued at \$2,461,755,-678.00. Adding to this amount the estimated farm valuation of the principal cereals, viz: \$1,648,266,206.00, we have a total of \$4,110,021,884.00, representing a valuation of the great grain crops, and of animals upon the farms of the United States and Territories, as officially estimated at the close of the year.

The crop of cotton is estimated by the best mercantile authorities at 8,700,000 bales, though some merchants of large experience in this staple place it at 9,000,000 bales. The Agricultural Bureau estimates the average price per pound received by planters at 7.3 cents against 8.6 cents in 1890.

The crop of hay is estimated at about 47,000,000 tons, and the tobacco crop at 486,500,000 pounds.

Of the number of animals marketed, Chicago received 14,304,480, including 3,250,359 cattle, 205,383 calves, 8,600,805 hogs, 2,153,537 sheep and 94,396 horses; the valuation of these receipts amounted to \$239,434,777.

Of the quantity of grain marketed during the year, Chicago received 231,821,429 bushels, or 163,000,000 bushels more than was received during the same time by any other western market, these receipts being largely in excess of the receipts of any other market in the United States. From these enormous receipts, and their resultant enterprises, has proceeded the prosperity of the diversified financial, manufacturing and trading life of Chicago during the year just closed. Without the facilities created and maintained by this Board of Trade, such a vast volume of receipts could not have been advantageously handled. As it is, these facilities have in a special and important sense contributed to the business of our city by supplying the country with money whenever needed, thus bringing about that mutually profitable and wide-spread exchange of all kinds of commodities between consumer and producer which constitutes the very essence of enlightened mercantile life.

The crop of corn for the year aggregated 2,060,154,000 bushels produced on 76,204,515 acres, valued at \$836,439,228, against 1,489,970,000 bushels grown on 71,970,763 acres, valued at \$754,433,451 in 1890, and 2,112,892,000 bushels, the product of

78,319,651 acres, valued at \$597,918,829 in 1889. Although the crop of corn this year is somewhat less than that of 1889, which was the largest ever raised, its valuation was \$238,520,399 more. Among the corn producing States, the great State of Iowa led the van with 350,878,000 bushels, on 9,560,716 acres; next followed Illinois, yielding 234,880,000 bushels on 7,011,336 acres; then came Missouri, producing 203,210,000 bushels on 6,796,318 acres; followed by Nebraska, Kansas, Indiana, Ohio, Kentucky, Tennessee and Texas, in the order of their production, comprising the principal maize yielding states. This crop is not only the most extensive of all our cereals, but it is the most valuable one. It is distinctively American, and finds its principal market within our territorial limits. Enormous as it is, it is not larger than the extensive opportunities which are presented within our own borders for its profitable consumption. It is easily and inexpensively cared for, and, when well matured, may be carried without any deterioration of its intrinsic value. It accounts for the superior quality of our cattle and hogs, and it is extensively used as an article of food for our population. The soil of all our states and territories responds to its cultivation and in the rich alluvial fields of the corn belt lying in the fertile valleys of the Missouri and of the Mississippi, millions of acres are covered with its luxuriant production. It not only challenges the attention of the farmer, but the capitalist and business man consider it of highest importance in forming their plans and purposes. Its abundance stimulates enterprise in all departments of trade, and so manifold are the profitable uses to which it is applied that, however large its output, it is never superabundant. The average annual production of corn per acre, this year, was twenty-seven bushels, the average value per bushel 40.6 cents, and the average value per acre \$10.98. Its average annual production for the past twenty years is 1,455,998,094 bushels. The monthly records of conditions were as follows:

	July.	Aug.	Sept.	Oct.
1890.....	93.1	73.3	70.1	70.6
1891.....	92.8	90.8	91.1	92.5

Its prolific yield is a constant and urgent invitation to the immigrant to set up his home where nature waits upon the husbandman with a prodigal hospitality.

Our crop of wheat aggregated 611,780,000 bushels, grown on 39,916,877 acres, valued at \$514,472,711, against 399,262,000 bushels, grown on 36,087,154 acres, valued at \$334,773,678 in

1890. The average crop for ten years from 1880 to 1889, was 449,695,359 bushels, with an average acreage of 37,279,162 acres and an average valuation of \$371,809,504. The crop of 1891 is the largest ever recorded, of which 66 per cent. was winter and 34 per cent. spring wheat. The average yield per acre was 15.3 bushels, the average value per bushel \$3.9 cents and the average value per acre \$12.86. The yield of this crop per acre exceeds that of any other crop of wheat raised in this country, but is not equal to that of Holland nor of England.

The great wheat growing countries in the order of their production are as follows: The United States, France, India and Russia.

The following record of monthly conditions of winter wheat is submitted:

April.....	96.9
May.....	97.9
June.....	96.6
July.....	96.2

The condition of spring and winter wheat at harvesting in September, was 96.9 against 75.5 for the year 1890 and 87.5 for 1889.

The following table shows the crop condition of winter wheat for each year beginning with 1879, with the condition of both spring and winter wheat together reported on the 1st of September; and also shows the yield per acre in bushels, according to the official estimate at the close of the year. These figures and all other data concerning the crops are derived from the United States Department of Agriculture, whose statistics and observations are of incalculable advantage to the entire country and to all the markets of the world:

Year.	Winter Wheat.				Spring Wheat.			All Wheat.	
	April.	May.	June.	July.	June.	July.	August.	September	Yield per acre.
1879.....	100.0	91.0	97.0	95.0	92.0	85.0	97.0	13.8
1880.....	99.0	99.0	95.0	92.0	92.0	89.0	92.0	13.1
1881.....	88.0	74.0	80.0	98.0	89.0	78.0	73.0	10.2
1882.....	100.0	100.0	99.0	100.0	98.0	97.0	97.0	100.0	13.6
1883.....	80.0	83.5	75.0	79.0	100.0	100.0	97.0	83.0	11.6
1884.....	95.4	94.0	93.0	94.0	100.0	100.0	98.0	98.0	13.0
1885.....	76.3	70.0	62.0	65.0	97.0	96.0	93.0	72.0	10.4
1886.....	94.1	94.9	92.7	91.2	98.5	83.3	80.1	87.8	12.4
1887.....	88.1	85.8	84.9	83.5	87.3	79.3	78.8	82.0	12.1
1888.....	82.0	73.1	73.3	75.6	92.8	95.9	87.3	77.3	11.1
1889.....	94.0	96.0	93.1	92.0	94.4	83.3	81.2	87.5	12.9
1890.....	81.0	80.0	78.1	76.2	91.3	94.4	83.2	75.5	11.1
1891.....	96.9	97.9	96.6	96.2	92.6	94.1	95.5	96.9	15.0

The uniformly favorable meteorological influences of the season have had much to do with exceptionally large yields in many localities. Many fields have yielded 30, 40 and even 50 bushels to the acre.

Minnesota produced more wheat than was grown in any other state, viz., 55,333,000 bushels; then came Kansas with 54,866,000 bushels, followed by Indiana with 52,807,000 bushels, North Dakota with 52,105,000 bushels, Ohio with 45,531,000 bushels, California with 36,595,000 bushels, Illinois with 35,025,000 bushels, and Michigan with 30,205,000 bushels, these comprising the chief wheat-producing states.

Our exports from this crop for the calendar year aggregated 129,638,934 bushels, against 49,271,580 bushels in 1890. During the fiscal year ended June 30, 1891, we exported 55,131,948 bushels, against 54,387,767 bushels in 1890. The food needs of Europe were not developed until the latter half of the year, so that our exports of wheat, as shown in the reports for the fiscal year do not convey the information required for a complete understanding of our wheat reserves and of the demands made upon our supply by foreign markets.

Nothing but the unprecedented volume of our crop prevented extreme prices this year for the American product. The effect of so-called short selling upon prices should not be mistaken for the result produced by an extensive yield. The doctrine laid down by John Stuart Mill is corroborated and emphasized by experience, viz: "When speculation in a commodity proves profitable, it is because in the interval between buying and reselling the price rises from some cause independent of the speculators, their only connection with it consisting in having foreseen it." Now the converse of this is also true, that when speculation in a commodity proves profitable to the short seller, it is because in the interval between selling for delivery at a future time, and buying in order to make that delivery, the price declines from some cause independent of the speculators, their only connection with that decline consisting in having foreseen it and in having exercised a sagacity, intelligence and courage with reference to it not exercised by the majority of their fellows. Speculators do not in any sense hold in abeyance the governing law of supply and demand, much less annul it; they simply, by virtue of a quicker intelligence than is exercised by others, detect and interpret that law and receive their entitled and legitimate reward. In short,

they put themselves in harmony with that law and the law governs them, ~~they not~~ controlling the law. The law is irresistible, and if they are not conforming to its mandates, they must succumb and pay the penalty. If they correctly forecast the future, ~~they must~~ be benefited thereby. If, on the other hand, they misinterpret that law, they suffer. The speculator's safety and profit lie in working along the line of its declarations and in reading those declarations in advance of the multitude; and when he has thus divined them, it is in bad taste for the multitude to cry out against him. He is entitled to the fruits of his ability, and he must and does bear the consequences of his inability.

Legislative acts and congressional fiats cannot nullify the legitimate effect of a volume of supply upon prices, or prevent a man, especially in this country, from realizing the fruits of his own sagacity in forecasting the effect of that supply upon the market. The great law of supply and demand which I am discussing is not only greater than the speculator, but it is beyond the control of Mr. Hatch or Mr. Washburn, or of the Congress of the United States. Congress might as well enact a law to prevent a man from thinking. Even persecution can not do that. Speculation in breadstuffs, or in any article in general demand, can no more be prevented than the procession of the seasons can be interfered with. Lord Kenyon, two hundred years ago, held that speculation in breadstuffs was against public policy and immoral, but soon thereafter this decision of his lordship was relegated to the limbo of overruled cases. Rather let congress try to teach the farmer the advantages of a diversification of his crops, and to impress upon him the fact that the price of his entire crop of wheat is fixed by the export price of that grain, and that it must be sold in competition with other surplus wheat-producing countries. Legislation can not cause goods which are in superabundance to sell at high prices; it cannot make high prices for cotton upon a crop of 9,000,000 bales, with the existing demand; nor for wheat in a surplus wheat-producing country, at a time when the world's food supply is more than ample for the world's food needs. Nothing can interfere with high prices when the supply is scant—certainly not class legislation—except the utter absence of a speculative demand at times of excessive receipts. If the farmers, in the conduct of their business, accept the advice of politicians and millers, they will believe the doctrines laid down in the Hatch and Washburn bills. If they accept the counsels of merchants, under

whose advice these agricultural interests have been marvelously developed, they will reject those doctrines as specious, delusive and unsound to the core. The producer and seller may call upon legislation to advance prices regardless of the volume of offerings; the buyer may invoke the same authority to reduce prices regardless of the volume and urgency of the demand, but in spite of both these petitions for class legislation, the law of demand and supply will not be thwarted. If legislators listen to the pleadings of producers and sellers for high prices in plethoric times, how can they turn a deaf ear to the importunities of consumers and buyers for low prices in times of scarcity? If those bills, or anything like them, should be enacted, the farmer would be the first to cry out against the law and would clamor for its repeal. His position would be illustrated by that of the bishop who exclaimed "God forbid!" when, during a severe storm at sea the captain said, "Bishop, we shall all be in heaven in five minutes."

No man, no edict of a tribunal, legislative or judicial, can prevent one man from stipulating with another to deliver a bushel of wheat, a pound of sugar, a bag of gold, or any other article, at an agreed price, upon a certain date, or during a specified month; nor can any power exempt a seller from liability for the non-fulfillment of the terms of any such stipulation. The seller is held, and must be held, to the performance of his contract and to the delivery of merchandise or any property upon such terms, and at or within such a time, as may have been agreed upon by the contracting parties. The right to make such a contract is an inalienable one. A man possesses the right to agree to deliver any property at such time and price as may be agreed upon, whether at the time of making such agreement he is in possession of the property or not, and whether or not he may have bought such property under the same terms which attach to his own sale of such property; that property may be wheat, a house, an engine, a railway car, a government building or any other kind of property. The buyer and seller must not be interfered with except when the seller refuses to deliver, or the buyer refuses to pay, according to the terms of the contract. Under no other conditions than these can they be interfered with, though legislators may essay to do so. Into the domain of individual and commercial constitutional rights restrictive law shall not enter, much less inquisitorial legislation animated by political demagogism and the greed of millers.

The system of buying and selling for future delivery grew naturally and gradually out of the pressing necessities arising from the rapid growth of a vast fertile area, whose teeming products awaited facilities for ready and constant sale, at prices just to producer and buyer alike, and without any unfair advantage to either the capitalist or merchant on the one hand, or the farmer or the country dealer on the other. This system provides for the constant conversion into cash, at fair prices, of an enormous yield, chiefly comprising grain and hog products, regardless of the volume offered, and altogether independent of the restrictions and limitations of an actual consumptive demand.

The only option feature in the system is the right to deliver at any time during the month for which the sale was made, the obligation all the while existing to deliver the actual property sold during the month when it was agreed to make the delivery of such property. The system secures to the farmer the unfettered operation of the law of supply and demand, bringing the prospective demand to his door and making it a present and an actual one not primarily in the interest of any person, either the buyer or seller, but in the interest of justice, and of arriving at a fair price, which price in a surplus wheat producing country can only be arrived at in view of the world's food supply and the world's food needs.

Per contra, the prospective supply is likewise brought into the market as a present factor, which with the prospective demand fixes the proper values of the chief crops. The farmer, by means of these and corresponding facts, which only an intelligent and intense competition reveals, is made acquainted with the determining features of the world's markets, and without such knowledge he would be unable to decide intelligently when and at what price he will part with his holdings; but he is kept informed and that without expense to him, of the correct answers to all those inquiries which are suggested in attempting to place true values upon his respective products.

Speculation, the inevitable result of the operations of this system of buying and selling for future delivery, summons all these answers, not by slow, inadequate and primitive methods, but by the lightning messenger which day and night flashes them under oceans and across continents to distant markets and fields. This is not all, the telegraphic voice tells of the quotations of farm

products in the great markets of the world and of all those varying phases of commercial and political life which affect the values of the great staples.

All this information reflects the judgment upon the business outlook, of the great merchants of the world whose interests compel them to a studious consideration of the world's food supplies and of the world's food requirements.

Speculation makes the market a powerful magnet drawing continuously to itself all things which the farmer needs to know concerning his material prosperity. This constant flow of information, which is of vital commercial importance, prevents wide fluctuations in prices and renders it impossible for any man or any association of men to take any advantage whatsoever not extended to all. Speculation stimulates enterprise; it creates and maintains proper values; it gives impulse and ambition to all forms of industry—commercial, literary and artistic; it arouses individual capacities; it is aggressive, intelligent, and belongs to the strongest and ablest of the race; it grapples undismayed with possibilities; it founded Chicago, and developed the great West, which is the basis of the Nation's prosperity and the impelling commercial power of the continent.

Speculation explores all countries and markets; and, not as a monopolist, but for the common good, dispenses its information with an unstinted hand for the benefit of producer and consumer alike. Speculation breaks down all schemes for the enrichment of the few at the expense of the many, and contributes to a general commercial prosperity; speculation in grain shatters syndicates of millers and of capitalists formed to depress prices of grain; speculation is not selfish; it is broad, frank, generous, and belongs to the most enlightened influences of the century, and has brought about, more than anything else, its triumphs. It spreads valuable information, statistical and otherwise, upon the commercial bulletins of the world, that all may know the conditions and factors which enter into the proper determination of values, and the intelligent transaction of business in farm products.

If the Hatch bill should be enacted, instead of having prices of wheat, corn and provisions made in Chicago, whose interests are identical with the interests of American agriculture, they would be made in Liverpool, London or Montreal. Is it not enough to have our agricultural products carried to foreign mar-

kets under foreign flags, enriching foreign nations, without having the value of these products determined in foreign and buying countries?

The crop of oats aggregated 738,394,000 bushels, grown on 25,581,861 acres, valued at \$232,312,267, against 523,621,000 bushels grown on 26,431,369 acres, valued at \$222,048,486 in 1890. The volume of the crop is nearly equal to that of 1889, produced on 27,462,316 acres. The yield per acre is remarkable,—28.9 bushels,—and has resulted in a crop more than 200,000,000 bushels greater than the crop of 1890. The average price per bushel was 31.5 cents, which is 11 cents less than that of the crop of 1890. The estimated valuation of the crop of 1891 exceeded by more than \$10,000,000 that of the crop of 1890.

Illinois produced 111,095,000 bushels, which is about 9,000,000 bushels more than was produced by any other state. After Illinois, came Iowa with 102,577,000 bushels. These states are far in advance of any other states in the yield of oats. The next state in the order of production is Minnesota, which raised 52,015,000 bushels. Then follows, Wisconsin, Nebraska, New York, Kansas, Pennsylvania and Michigan among the largest oat-producing states.

Below is an official statement of conditions of the crop of 1890-1.

	June.	July.	August.	September.
1890.....	89.8	81.6	70.1	64.4
1891.....	85.1	87.6	89.5	90.7

which compliments the Statistician of the Agricultural Department, as it harmonizes with the development of the two crops. This statement is a digest of many reports from a great variety of locations and from a large number of farmers.

FARM ANIMALS.

The number of farm animals, comprising horses, mules, milch cows, oxen and other cattle, sheep and swine, as estimated by the United States Department of Agriculture in its January and February report, was 169,216,813, which would make a solid column of more than seventy-two abreast reaching from San Francisco to Boston.

The following statement shows the number of farm animals for each of the last two years:

Stock.	1891.	1892.	Increase.
Horses	14,056,750	15,498,140	1,441,390
Mules	2,296,532	2,314,699	18,167
Milch Cows.....	16,019,591	16,416,351	396,760
Oxen and other cattle.....	36,875,648	37,651,239	775,591
Sheep.....	43,431,136	44,938,365	1,507,229
Swine	50,625,106	52,398,019	1,772,913

The increase in the number of swine has been general; Iowa, which produced the largest quantity of corn, had the greatest number of these corn-fed animals, viz., 7,105,320. The state which had the next greatest number is Illinois, which had 4,894,815; then came the states of Missouri with 4,632,264, Kansas with 3,175,767, Ohio with 2,851,228, Nebraska with 2,586,952, Indiana with 2,586,380, Kentucky with 2,346,208, Texas with 2,321,246, Tennessee with 2,287,059, Georgia with 1,691,275, and Arkansas with 1,663,109, including the chief swine and corn-producing states. Sheep have increased in numbers in nearly all of the states, and now number 44,938,365. Milch cows have increased largely in the New England states and in most of the Southern states, but in a comparatively limited degree in the Western states. In the older and wealthier sections these animals are found not only in great numbers, but of superior quality and of the best breeds, since the people in those sections naturally demand a more luxuriously supplied table, and dairy products of superior excellence. The great West possesses such a wealth of agricultural resources, and the means of rapid and cheap transportation are so abundant that these animals may be profitably kept in great numbers in those parts of our country whose volume of agricultural products is relatively small. This is one of many illustrations of the wonderfully favorable economic relations which the different portions of this country sustain to each other.

Horses have increased very largely in number, nearly 1,500,000; they now number on the farms 15,498,140, and are more and more doing the farm work formerly done by oxen and mules. Prosperity in farming banishes mules and oxen and introduces horses. Mules belong to a scrub way of farm living and fine

horses on farms indicate farm thrift. Fine stock raising has no small part in the ambitious life of the Western and Southern farmer. The demand from large cities and prosperous manufacturing centers for fine animals and blooded stock, affords a ready and favorable market for the stock raiser. Illinois, Iowa, Texas, Missouri, Kansas and Ohio are the principal horse-raising States.

Sheep have increased in number since 1891, 1,500,000, or about three per cent. Texas raised 5,040,175, Ohio 4,468,087, California 4,083,541 and New Mexico 2,967,480. The total number on farms was 44,938,365.

The value of all farm animals amounted to \$2,461,755,678 equal to a per capita valuation of \$40.00, or an increase of 33½ per cent. in twelve years.

The average price of farm animals of each kind, on the first of January of each year, for a series of years, is given in the following statement:

YEAR.	Horses.	Mules.	Milch Cows.	Other Cattle.	Sheep.	Swine.
1879.....	\$52 41	\$56 06	\$21 73	\$15 39	\$2 07	\$3 18
1880.....	54 75	61 25	23 27	16 10	2 21	4 28
1881.....	58 44	69 79	23 95	17 33	2 39	4 70
1882.....	58 52	71 35	25 89	19 89	2 37	5 98
1883.....	70 59	79 49	30 21	21 80	2 53	6 75
1884.....	74 64	84 22	31 27	23 52	2 37	5 57
1885.....	73 70	82 38	29 70	23 25	2 14	5 02
1886	71 27	79 60	27 40	21 17	1 91	4 25
1887.....	72 15	78 91	26 08	19 79	2 01	4 48
1888.....	71 82	79 78	24 65	17 79	2 05	4 98
1889.....	71 89	79 49	23 94	17 05	2 13	5 79
1890	68 84	78 05	22 14	15 21	2 27	4 72
1891.....	67 00	77 88	21 62	14 76	2 50	4 15
1892.....	65 01	75 55	21 40	15 16	2 58	4 60

The following statement shows the stock values for three years:

STOCK.	1890.	1891.	1892.
Horses.....	\$978,516,562	\$941,823,222	\$1,007,593,632
Mules	182,394,099	178,847,370	174,882,070
Milch Cows.....	353,152,133	346,397,900	351,378,132
Oxen and other cattle.....	560,625,137	544,127,908	570,749,155
Sheep.....	100,659,761	108,397,447	116,121,270
Swine	243,418,336	210,193,923	241,031,415
Totals	\$2,418,766,028	\$2,329,787,770	\$2,461,755,678

FOREIGN COMMERCE.

The value of our foreign commerce including imports, exports and in transit trade, during the fiscal year ended June 30, 1891, was \$1,844,392,840, against \$1,758,537,945 during the corresponding year of 1890. Our exports of domestic merchandise for the year amounted to \$872,270,283 in value against \$845,293,828 in 1890, and \$730,282,609 in 1889, and \$693,282,102 in 1888. Our in transit trade consists of foreign merchandise brought to this country for immediate shipment from its ports or across its territory to other foreign countries, and constitutes a portion of our carrying trade by sea and land, but should not be considered a part of our foreign commerce. This in transit trade amounted last year to \$57,497,917 in value, against \$55,699,426 during the preceding fiscal year.

The products of agriculture furnished 73.69 per cent. of our total domestic exports, and the products of manufacture, 19.37 per cent. With the exception of .41 per cent., the products of mining, of the forest and of the fisheries supplied the balance.

The increase in value of our exports over those of the year immediately preceding was mainly in cotton, iron and steel not including iron ore, beef products and sugar. 50.63 per cent. in value of our domestic exports was shipped to the United Kingdom and 29.20 per cent. to the rest of Europe. Our exports to Great Britain and Ireland amounted in value, during the fiscal year just passed, to \$441,599,807, against \$444,459,009 in 1890. The year of our largest exports was that of 1881.

The chief articles in the list of our exports were cotton and its manufactured products, valued at \$304,317,755; breadstuffs, valued at \$128,121,656; provisions, valued at \$139,017,471; oils, valued at \$51,705,001; animals, valued at \$32,935,086; iron and steel, valued at \$28,909,614.

The average price of cotton exported during the fiscal year ended June 30, 1891, was 10 cents per pound; of corn, 57 cents; of wheat, 93 cents per bushel; of bacon and hams, 7.6 cents; of lard, 7 cents; of pickled pork, 5.9 cents; of salted pork, 5.6 cents; of salted beef, 5.6 cents; of butter, 14.4 cents per pound.

A comparison of the leading commercial nations with respect to their foreign commerce, places the United Kingdom of Great

Britain and Ireland first, Germany second, the United States third and France fourth.

The following interesting and valuable statement, obtained from the Chief of the Bureau of Statistics, is submitted, showing the value of our exports of provisions, exhibiting the course of commerce in bacon and hams, pork, lard, meat and dairy products, since 1860:

Year ended June 30.	HOG PRODUCTS.				Beef Products.	All other Meat Products.	Dairy Products.	Total Value.
	Bacon and Hams.	Pork.	Lard.	Total Hog Products.				
1860....	\$ 2,273,768	\$ 3,132,313	\$ 4,545,831	\$ 9,951,912	\$ 4,272,509	\$	\$ 2,709,951	\$ 16,934,363

1891....	45,650,674	4,843,901	34,414,323	84,908,698	35,088,315	9,156,678	9,863,780	139,017,471

Comparing the last fiscal year with that immediately preceding, it appears that the value of our domestic commodities exported to France, increased \$10,813,735; to Germany, \$7,369,766; to China, \$5,756,618; to Brazil, \$2,146,777; to Spain, \$1,871,620; to British Australasia, \$1,723,598; to Mexico, \$1,532,972; and to the Central American States, \$1,475,641. Our exports decreased to the Argentine Republic, \$5,604,552; to Great Britain and Ireland, \$2,859,202; to Russia in Europe, \$2,769,553; and to the British North American Possessions, \$1,198,939. Our export trade reveals the fact that the United States supplied but 38.34 per cent. of the wheat and flour which the United Kingdom purchased of surplus wheat producing countries during the fiscal year

of 1891. In 1887 we supplied 62.65 per cent. of that demand. Does that look as though American speculation so depressed values of wheat, that here it was unnecessarily low?

Our exports of gold and silver coin and bullion, including domestic and foreign gold, during the fiscal year amounted to \$108,953,642, of which \$63,277,238 were shipped to England, \$16,531,287 to Germany and \$14,659,015 to France.

Our imports during the fiscal year amounted in value to \$844,916,196, against \$789,310,409 in 1890. The increase in the value of free goods over those imported in 1890 was \$100,572,723, caused mainly by the transfer of dutiable articles to the free list. The value of articles of food and live animals imported during the fiscal year amounted to \$284,715,737, and that of articles in a crude condition which enter into the various processes of domestic industry, \$196,393,669. From Great Britain and Ireland we received 18.7 per cent. of our imports, from Germany 20 per cent., from France 13.4 per cent., from the Netherlands 18.4 per cent. Of our total imports 43 per cent. were free of duty and 57 per cent. dutiable. The value of our imports from Brazil exceeded our exports to that country during 1891, \$69,110,349, and our excess of imports in our commerce with the West Indies amounted to \$52,002,254. The value of our total excess of imports over our exports amounted to \$276,607,498. The principal countries with which our import trade exceeds our export trade are the following: Brazil, West Indies, British East Indies, France, Japan, Switzerland, Mexico, China, Austria-Hungary and Hawaiian Islands. The value of our imports carried in American vessels during the year amounted to \$127,471,678, and in foreign vessels \$676,511,673. The value of our total imports and exports, during the year, carried in American vessels amounted to \$206,439,725, and in foreign vessels \$1,450,101,087. Of the value of our foreign commerce 7.17 per cent. was carried in American steam vessels, 4.79 per cent. in American sailing vessels, 73.11 per cent. in foreign steam vessels, 7.96 per cent. in foreign sailing vessels, and .48 per cent. in vessels whose nationality is not classified.

IMMIGRATION.

The number of immigrants arrived in this country during the last fiscal year was 560,319, of which 354,059 were males and

206,260 females; 247,596 were without occupations. The total number who died on the voyage was 274, of which 156 were males and 118 females. From Great Britain and Ireland came 122,311; from Germany 113,554; from Italy 76,055; from Russia and Poland 74,923; from Austria-Hungary 71,042; from Sweden and Norway 49,448. The United States statistics concerning immigration show that nearly one-half of the immigrants are without occupation. These are principally women and children. Of the immigrants with occupation, 2 per cent. were engaged in professions, 22 per cent. skilled artisans, and 76 per cent. unskilled laborers. The statistical tables relating to emigration from the United Kingdom for 1887, show that in 1886 out of 54,507 adult males (12 years and upward) of British and Irish origin who migrated from Great Britain, 26,096 were general laborers, 9,171 were agricultural laborers, gardeners, etc., and 12,906 were of occupations not stated. Of the emigrants from Germany in 1886 arriving in the United States by way of Hamburg, 33.58 per cent. were returned as of no occupation; these were presumably women and children; 24.89 per cent. were laborers; 15.87 per cent. were agriculturalists; 16.70 per cent. were of the industrial classes, and 8.96 per cent. of the commercial classes; from Italy during 1886, 59.63 per cent. were husbandmen and shepherds; 12.43 per cent. were day laborers; 13.30 per cent. artisans and operatives, and 5.49 per cent. were masons and stone cutters. The number of immigrants arrived in the United States from 1880 to 1888 inclusive, classed as laborers, was 1,186,114. These are the men who build our railroads, clean our streets, and handle freight, etc., etc.

From the report of the Secretary of State of the state of New York it appears that in 1887, there were in country poorhouses in that state 9,172 native paupers and 9,288 foreign paupers, while in city poorhouses, there were 1,800 native and 34,167 foreign born. According to the census of 1885, vol. 1, part 2, p. 1265, of the paupers in Massachusetts, 44.3 per cent. were of foreign birth. Of 3,696 paupers of foreign birth, 2,829 were Irish, that is, 76.5 per cent., although the Irish constituted only 46.4 per cent. of the foreign born population.

The total number of illiterates in Massachusetts in 1885 was 122,263 and of this only 13,898 were native born, while 108,365 (88.63 per cent.) were foreign born.

Under the Act of 1882 which provides for the return of convicts, there were sent back from the port of New York of such persons, in 1883, 1,350; in 1884, 1,144; in 1885, 1,172; in 1886, 997; in 1887, 289, and in 1888, 502. During 1888, 707 immigrants were reported by the commissioners to the clerk of the port of New York as being of the prohibited classes, but of this number, only 502 were returned. In addition, 569 persons, unable to maintain themselves, were returned to Europe, their passages having been paid wholly or in part by the Commissioners of Immigration.

In this connection it is advisable to allude to some of the organizations and plans which have been created and are in operation in other countries, to dispose of those classes of citizens which are, to say the least, undesirable. According to the testimony of Mr. Wolff, before the Ford Investigation Committee, there exists in Munich, Bavaria, a society for the purpose of assisting discharged convicts. According to its own report, the society assisted in 1883, 27 discharged convicts who wished to emigrate; and its branches in the Provinces, assisted five others; and in 1884, this association assisted 30 such emigrants. In Boston the Chief of the State Board of Lunacy, testified that he had detected two cases of discharged convicts who had been assisted by the British authorities to come over to this country. The British government has been active in assisting paupers to emigrate. According to a memorandum of the Local Government Board, of September, 1886, the poor law guardians have always had the right, since the poor law acts of 1834, to use money for the purpose of assisting paupers to emigrate. From 1851 to 1886, the number of persons thus assisted was 40,154. By the Land Act of 1881, the Land Commission was authorized to advance to the Poor Law Guardians, by way of a loan, money to assist emigration, especially of families from the poor and densely populated districts of Ireland.

The Tuke Committee in England was organized in 1882, for the purpose of assisting families to emigrate. In the spring of 1882, the committee sent to various destinations in the United States and Canada, nearly 1,500 persons (about 266 families) not in any way assisted either by the Government or the Poor Law Guardians. During the following year the committee, with the aid of the Government, sent out over 1,000 families or nearly

8,000 persons. During the same period about 16,600 persons were assisted by government agencies.

The London "Times" of January 31, 1889, says, that the Prisoners' Aid Society assists convicts to emigrate. That the Prisoners' Aid Society have assisted convicts to emigrate is admitted, and probably the United States received its full quota of persons so aided. In Sweden, philanthropic societies have paid the passage of liberated criminals to America.

The country is alive to the dangers which threaten the security of the republic, through the evasion of our immigration laws, or by reason of their not being faithfully executed. These dangers are arresting more and more the thoughtful attention of the citizen. The congress of the United States has instituted careful and thorough inquiry concerning not only the execution of our immigration laws, but the defects in those laws, which a careful investigation of the conditions of foreign populations disclose.

This agitation and these official investigations may bring about such amendments to our immigration laws as will prohibit an immigrant from landing, unless he or she produces a certificate of requisite moral and physical qualifications from the proper authorities, duly countersigned by a United States Consul. This would be entirely practicable, as such certificates can, when deserved, be in all cases readily obtained, especially in the continental countries of Europe whose laws require that a record shall be kept of every subject. Although such laws do not obtain in Great Britain, still from a recognized source of authority such certificates could be easily secured. It may properly be observed, however, that it would be wise to execute the law as it now exists before proposing further legislation.

The immigrant law of 1882 was passed because of the bad features of involuntary emigration. This law forbids the landing on American soil of four classes of persons, the convict, idiot, lunatic and pauper.

CHICAGO.

The population of Chicago is 1,250,000. The nationalities comprising this population are stated upon page 142 of this report.

During the year 11,805 buildings were erected covering a frontage of 282,672 feet, and costing \$54,001,800. As indicating the value of land in this city, and the consequent necessity of its utili-

zation by the erection of high buildings, the statement that there were 5,391 passenger elevators inspected during the year, is instructive.

There were on December 31, 1891, 774.78 miles of paved streets in the City of Chicago, of which 481.63 miles were paved with wood and 23.34 miles with stone. During the year, 122.95 miles of streets were improved. The total miles of streets, paved and unpaved, is 2,332.01, and of streets and boulevards 3,163.84. The area of Chicago is 180.2 square miles, or 115,328 acres; and in the park and boulevard system there are 2,597.75 acres. The city has a river frontage of 41 miles. The municipal bonded indebtedness amounted to \$13,530,530.

There were 27,754 deaths in Chicago during 1891, being 22.20 per 1,000 inhabitants.

The number of miles of railways tributary to Chicago east and west of the Missouri river, including main lines and branches, is 76,865, and the number of miles of eastern and southern roads finding their termini in this city is 11,336, making a total of over 88,200 miles of railway connecting Chicago with the states, and with Canada and Mexico.

The receipts of the Chicago postoffice for the year amounted to \$3,693,877.58; the expenses amounted to \$1,376,997.99, showing a net income or surplus of \$2,316,879.59. The number of letters and postal cards distributed during the year was 254,423,884. The annual and detailed official statement of this prominent governmental office, may be found on pages 104 and 105 of this report. A careful scrutiny of the figures there presented must convince one of the intense activity of the business and social life of this city.

Every facility is afforded by the accomplished postmaster Col. James A. Sexton, for the prompt collection and distribution of the mails.

The receipts of grain, and flour in its grain equivalent, at Chicago during the year 1891 aggregated 231,821,429 bushels, showing an increase of 8,501,398 bushels over like receipts in 1890, which were the largest then recorded. The receipts of wheat showed an increase over those of the previous year; the receipts of corn, oats and barley showed a decrease, and those of rye an increase.

There were 301,976 cars of grain inspected in this city during

the past year, and in addition 4,699,368 bushels received via lake and canal, against 268,113 cars and 5,714,479 bushels respectively inspected during the year immediately preceding.

The storage capacity of grain elevators declared regular elevators for the storage of grain under the provisions of the rules of this Board, is 30,075,000 bushels. The largest of these grain elevators has a capacity of 3,000,000 bushels. A statement showing the capacity, designation and location of these elevators, may be found on page 34 of this report.

The shipments of flour and grain were 207,987,762 bushels. The shipments of corn aggregated 66,578,300 bushels, and of oats 68,771,614 bushels, and of wheat 38,990,169 bushels.

The shipments of rye aggregated 7,572,991 bushels and of barley 7,858,108 bushels. The shipments of wheat exceeded those of the previous year by about 27,000,000 bushels. There was, however, a falling off in the shipments of corn, oats and barley, to the extent of 27,500,000 bushels.

The receipts of cured meats for the year aggregated 206,898,958 pounds, and the shipments 751,584,862 pounds.

The receipts of lard aggregated 74,021,945 pounds, and the shipments 362,109,099 pounds. Of dressed beef we received 105,061,775 pounds, and shipped 877,295,875 pounds.

The receipts of live stock during 1891 comprised 3,250,359 cattle, 2,153,537 sheep, 8,600,805 hogs, 205,383 calves, and 94,396 horses, aggregating 14,304,480 animals, valued at \$239,434,777.00, received in 304,706 cars. This, in number, is 3,247,310 more than the receipts of these animals during 1890. The valuation of our receipts of live stock for twenty-six years amounts to \$3,447,416,225.00.

The receipts of grass seeds, including flax seed, during the year 1891 aggregated 79,286,369 pounds, and the shipments 65,143,769 pounds, against 72,086,100 pounds and 59,213,036 pounds, respectively, in 1890.

The receipts of hides aggregated 110,891,694 pounds, and the shipments 198,571,824 pounds, against 103,743,421 pounds and 199,083,622 pounds, respectively, in 1890.

Of lumber we received 2,045,418,000 feet, and shipped 865,949,000 feet. Of shingles 303,895,000 were received, and 99,855,000 were shipped.

The receipts of butter aggregated 127,765,048 pounds, and

the shipments 140,737,620 pounds, against 140,548,850 pounds and 156,688,837 pounds, respectively, in 1890. Our receipts of cheese during the year aggregated 62,922,939 pounds, and the shipments 50,304,235 pounds.

The volume of speculative grain business during the year is indicated by the report of the Chicago Board of Trade Clearing House. The total clearances for the year amounted to \$104,083,-529.67 against \$86,627,157.25 in 1890, and 55,463,080.75 in 1889. The heaviest transactions occurred in the months of March, April and May. The volume of business thus indicated will be found to correspond with the activities of the markets as described elsewhere under appropriate heads.

The aggregate capital of the National banks in this city amounted to \$22,300,000, and of the State banks \$12,527,000. A detailed statement concerning these institutions will be found on pages 120 and 121.

The total bank clearances for the year amounted to \$4,456,-885,230.49; against \$4,093,145,904.00 for 1890. Upon page 117 may be found a statement of clearances by months, from 1887 to 1891, inclusive.

The number of vessels cleared during the last year from the port of Chicago was 10,294, and arrived 10,224, representing an aggregate tonnage of 11,031,552 tons.

The following statement furnished by Hon. S. G. Brock, Chief of Bureau of Statistics, United States Treasury Department shows the number and tonnage of vessels entered and cleared in the foreign trade at the ports of New York, Boston, Philadelphia, Baltimore, New Orleans and San Francisco during the calendar year 1891 :

ENTERED.

Ports.	Sail.		Steam.		Totals.	
	No.	Tons.	No.	Tons.	No.	Tons.

Statement of the tonnage of vessels entered and cleared at London, Liverpool and Havre, in the foreign trade, during the year ended December 31, 1890 :

	Entered. Tons.	Cleared. Tons.
London	7,708,705	5,772,062
Liverpool	5,782,351	5,159,450
Havre	2,159,213	2,259,663

WHEAT.

The characteristics of the wheat market for the year were pronounced, and although the trading in the early part of the season was without any special or well defined policy, ere long growing anxiety was felt with regard to the world's food supply and the world's food needs. Foreign grain merchants began to entertain fears with regard to the volume of the grain crops, especially of wheat and rye, at first in France, then in all other European countries, notably in Belgium, Germany, Spain and Italy. This impression gradually and strongly gained credence and American speculators in wheat appeared in the market as quite extensive purchasers. It was not long before grave apprehensions of an unusually short supply in Russia strengthened the disposition to purchase on the part of grain merchants in the principal markets of the world. Continued exports from Russia at this time had the effect of dispelling to a certain extent the belief of a serious shortage in the food crops of Russia. Reports of the volume of those crops varied from time to time and finally when the Czar prohibited the export of rye, and soon after the export of all other cereals, the wheat prohibition, however, being the latest, there followed a general and profound conviction that there was widespread famine in the interior of the empire. From this time the orders for the purchase of wheat in this country rapidly multiplied and were of an urgent character.

The trade, however, was somewhat intermittent even then, and there were those who entertained the belief that, after all, there was more or less exaggeration in the reports of suffering for want of food. This feature in the trade was strengthened by the knowledge that large quantities of wheat were still lying in the elevators in Russia, and would at an urgent moment be used for the relief of the starving peasantry and mining communities. A reaction then set in, caused by the modification of the high impost duties, of Germany and France, on grain. On wheat, flour and corn meal, the reduction was 30 per cent.

As the German government made very important concessions in the duties on American agricultural products, the United States can now deal with Germany as do Austria-Hungary and Italy in the matter of breadstuffs. The duties on wheat and flour, which, under the old law were 5 and 10.50 marks, respectively, are now 3.50 and 7.30 marks. The old duties were nearly prohibitive under ordinary conditions. Since equal reductions are made on wheat and flour imported from Austria-Hungary, the advantages which the latter has over the United States on account of her close proximity to Germany will give her the bulk of the trade. This applies equally to rye and oats. Under these circumstances we did not expect to materially increase our exports of these products to Germany. These concessions were made in consideration of the free entry into the United States of raw sugar from Germany, the imports of which in 1891 amounted to \$12,891,689. This treaty admits free or at reduced rates the following list of articles:—Wheat, wheat flour, rye, rye flour, oats, oatmeal, barley, malt, corn, corn meal, bread and biscuit, anise, caraway seed, etc., bed feathers, bark for tanning, timber, rough or hewn, sawed or otherwise prepared, cut veneering, hops, butter, oleo oil, oxen, hogs, fresh meats, prepared meats, except bacon.

At the point when the country was generally convinced that phenomenally high prices were to prevail, the official statistician of the United States Government announced a crop of almost 200,000,000 bushels in excess of that of 1890. Under these conditions confidence in extreme prices was seriously impaired, and the entire character of the market became radically changed. Those who had purchased under the belief of a general scarcity and an unusual demand, began gradually and cautiously to dispose of their holdings, and the market was, consequently, a variable

one with a feature of weakness controlling. The situation gave rise to a nervous condition in the markets and the reluctant abandonment of a strongly defined policy. This abandonment created from time to time an occasional excitement in the trade, which partook of the nature of a panic, though no serious results followed. Values were unsettled, and the trading was mainly sustained by local traders, outsiders withdrawing from the market.

The final report of the Agricultural Department of the United States showed the volume of wheat to be 611,780,000 bushels, as against 399,262,000 bushels in 1890. It was evident that the trade had not taken sufficient account of the fact that in times of famine the consumption of wheat is very materially diminished, and that famine stricken districts are not supplied with a full complement of bread. The relief which is provided for these districts does not in such times make good the ordinary consumption of grain; under these conditions it was not borne in mind that they must not only get along with a shorter supply, but must subsist upon a larger variety of food. The final statistics regarding the crops of the world showed that the world's supply of grain was about equal to that of the previous year.

The highest price obtained for wheat was in April, when No. 2 spring wheat sold in this market at \$1.14 per bushel, and it was claimed that a few sales were made at \$1.16.

No. 2 spring wheat sold at the beginning of the year at $88\frac{1}{4}$ to $89\frac{3}{4}$ cents. A very gradual and uniform improvement occurred during the month, and on the last day of January prices were quoted at $93\frac{3}{8}$ to $96\frac{1}{8}$ cents.

The month of February indicated rather a listless condition of the trade, and the variation in prices did not exceed about 5 cents per bushel throughout the month.

Confidence came to the trade in March and on the closing days of that month sales were made at from \$1.00 to $\$1.03\frac{1}{2}$ per bushel.

The speculative excitement increased in the month of April, when, on the 20th, sales were made at \$1.14 per bushel. From this point prices gradually weakened, and at the close of that month the market was $\$1.05\frac{3}{8}$. This was caused by a period of financial depression abroad, and a demoralization in the continental bourses.

The trading in the month of May was of an easier character, and prices throughout that month were without special significance, and ranged from $99\frac{3}{4}$ cents to \$1.08.

June disclosed a decided want of confidence in the maintenance of May values, and sales were made as low as 92 cents. However, for the major portion of the month they were about 97 cents.

In July the belief in high prices seemed to have been abandoned and few sales during that month were made at over 90 cents per bushel, much of the time prices ranging from 87 to 89 and 90 cents. On the 16th of that month prices were depressed to $84\frac{3}{4}$ cents per bushel, which was the lowest market for the year.

In August there was little change in prices during the early part of the month. On the 10th, sales were made at $91\frac{1}{2}$ cents, and from this point until the 28th a steady improvement took place, a few sales between these dates being made at \$1.07 per bushel. The month, however, closed with quotations at from $99\frac{5}{8}$ cents to $\$1.03\frac{1}{4}$. The improvement which occurred during this month was mainly owing to the report of heavy frosts, which it was feared had visited the late sown grain in the Northwest.

From the first of September, upon the receipt during that month of favorable crop news, prices declined, and ranged from 93 to $97\frac{1}{8}$ cents. This latter price was the result of a rumor sent from New York of the prohibition of the exportation of wheat by Russia. These rumors, it was soon developed, had no foundation in fact.

An improvement in the demand for export advanced prices on the 10th of October to 99 cents. They, however, declined from this point, as the trade had learned to place little dependence upon the rumors which in a variety of ways, and from a variety of sources, without any definite authority, were pouring in upon the market, and prices weakened until sales were made as low as $92\frac{1}{2}$ cents, the month closing, however, with sales at from $93\frac{1}{8}$ to 94 cents.

In the early part of the month of November, upon the news of the prohibition of exports by the Russian empire of all cereals except wheat, prices advanced to $96\frac{3}{4}$ cents. This price, however, was not maintained, and on the 19th of the month sales were made as low as $91\frac{1}{2}$ cents, prices being still further depressed, after a slight advance, to $91\frac{1}{4}$ cents on the 30th of that month.

On the 2d of December prices declined to $89\frac{3}{8}$ cents, fluctuating within a comparatively narrow range throughout the month. On the last day of the year sales were made at from $90\frac{1}{4}$ to $90\frac{5}{8}$ cents. The trade during the month of December was a comparatively dull one, there being no operations of moment in the market, the views entertained in the earlier part of the year concerning short supplies and an active demand from European countries having been dispelled, and confidence in extreme prices was abandoned.

The receipts of wheat for the year aggregated 42,931,258 bushels, and shipments 38,990,169 bushels, against 14,248,770 and 11,975,276 bushels, respectively, for 1890. The receipts for the crop year ending July 31st, aggregated 17,025,629 bushels, and including flour in its wheat equivalent, 36,051,107 bushels.

The following is a statement of the extreme prices each year for twenty-seven years, indicating the month in which such prices obtained:

Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865	December	85 @1 55	January.
1866	February	78 @2 03	November.
1867	August	1 55 @2 85	May.
1868	November	1 04½ @2 20	July.
1869	December	76½ @2 47	August.
1870	April	73½ @1 31½	July.
1871	August	99½ @1 32	Feb'y, Ap'l and Sept.
1872	November	1 01 @1 61	August.
1873	September	89 @1 46	July.
1874	October	81½ @1 28	April.
1875	February	83½ @1 30½	August.
1876	July	83 @1 26½	December.
1877	August	1 01½ @1 76½	May.
1878	October	77 @1 14	April.
1879	January	81½ @1 33½	December.
1880	August	86½ @1 32	January.
1881	January	95½ @1 43½	October.
1882	December	91½ @1 40	April and May.
1883	October	90 @1 13½	June.
1884	December	69½ @ 96	February.
1885	March	73½ @ 91½	April.
1886	October	69½ @ 84½	January.
1887	August	66½ @ 94½	June.
1888	April	71½ @2 00	September.
1889	June	75½ @1 08½	February.
1890	February	74½ @1 08½	August.
1891	July	84½ @1 16	April.

The following statement shows the wheat-producing portions of the world, and the months of their respective harvests:

January—Australia, Argentine, Chili and New Zealand.

February and March—East India and Upper Egypt.

April—Asia Minor, Cuba, Cyprus, India, Lower Egypt, Mexico, Persia and Syria.

May—Algeria, Central Asia, China, Florida, Japan, Morocco and Texas.

June—Alabama, Arkansas, California, Carolina, Colorado, Georgia, Greece, Italy, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Oregon, Portugal, South of France, Spain, Tennessee, Turkey, Utah and Spain.

July—Austro-Hungary, Bulgaria, France, Germany, Illinois, Indiana, Iowa, Michigan, Minnesota, New York, Nebraska, Ohio, Roumania, South of Russia, Switzerland, South of England and Upper-Canada.

August—Belgium, Columbia, Denmark, Great Britain, Holland, Lower Canada, Manitoba and Poland.

September and October—Norway, North of Russia, Scotland and Sweden.

November—Peru and South Africa.

December—Burmah.

CORN.

The market throughout the year was quickly susceptible to all legitimate influences, and the trade in this grain was managed with great ability. It exhibited during the year all phases and conditions of trade. It was in turn spasmodic, peevish, uninteresting, substantial and hopeful, with every prospect of sustained high prices. The old crop of corn, that of 1890, was about 600,000,000 bushels less than that of the preceding year. This fact alone induced many substantial shippers to lay in a large supply. On the other hand the great body of consumers scattered throughout the country, not so familiar with the facts of the market and of the crops, with relation to the universal demand, bought very sparingly, which kept a large number of small purchasers constantly in the market.

This condition of things enabled large holders and distributors to sell at constantly advancing figures, thereby giving to the wholesale trade and extensive dealers a most satisfactory business. The variations which visited the wheat market from time to time, as the result of conflicting European news regarding crops, temporarily disturbed the market, but these conditions had no permanent effect upon values, inasmuch as the profitable sale

of corn depends almost entirely upon the home demand. The distinction between this feature of the corn crop and that of the wheat crop was not sufficiently weighed by the great mass of small distributors throughout the country. As a consequence the intelligent and large buyers and distributors were not misled by rumors concerning the wheat supply and the wheat demand of the world, which temporarily disturbed the calculations of small dealers to a certain extent. The relation which the corn crop of this country bears to our general prosperity is more thoroughly understood by large merchants in the handling of this cereal than by the great mass of traders scattered throughout the country.

As the season advanced, and we approached that time when intelligent calculations could be made concerning the growing crop of 1891, holders operated with remarkable good judgment and detected in the times of depression in the market, caused by anticipations of a large crop, the opportunity for purchasing, knowing full well that the conditions of a consumptive demand were such that sales could in all probability be made at a handsome profit. In other words, the effect of a large new crop would not tell effectually upon prices until the crop was sufficiently cured to be safely distributed for consumption, the larger merchants all the time being supported in their calculations by the fact, which was a chief characteristic throughout the year, that comparatively small dealers throughout the country did not carry stocks in any considerable excess of immediate requirements.

As the season progressed, and we approached the period when the new crop of corn would be sufficiently cured to ship with safety, extensive dealers carried small stocks, having reaped the reward of wisely matured plans.

The general situation of the market was all the time strengthened by an increased export demand, and there never has been a year when the American holder of grain was more favorably situated for the profitable marketing of this crop than the year which has just closed. This was all in spite of the serious financial convulsions of the fall of 1890.

The weather during the summer months was unusually cool, and the growth of corn was retarded. This, added to the probability, which was seriously entertained, of early frosts, gave great confidence to holders. Perhaps the chiefest event of the year in

the trade in this grain was what may be called the "Deacon" White episode. This New York gentleman endeavored to corner the market on September corn. As a result of the Deacon's manipulations and schemes sustained by New York capital, the Deacon, instead of the corn, was cornered. The loss from this failure fell chiefly upon New York parties. The farmers of the country, quick to discern their advantage, shipped their reserves with absolute freedom, and taxed the Deacon's forces beyond their capacity. The decline which followed this collapse was in the vicinity of 20 cents a bushel, and at that point some of the Chicago houses, which were prominent in the deal early in the year, bought freely. After the marked decline which I have noticed, receipts diminished.

This condition of things as late as November developed a very large speculative short interest at a time when the stocks in Chicago were small. This condition of the market brought about a recovery of prices, as the new crop was not sufficiently matured to fill contracts, and for the second time in the year prices advanced to beyond 70 cents for the contract grade, selling on the last of the month of November at 74 cents. The result of this feature in the market brought serious loss to a few of the shorts, and indeed barely permitted the manipulators to escape harmless.

Seldom has the history of a year in this trade recorded a more able management in the interest of legitimate trade, or disclosed a more thorough acquaintance, not only with the condition of the grain itself and of the stocks in farmers' hands, but with the situation, regarding this trade, upon the side of the consumer. The exceptional features regarding the export demand of this grain were not lost sight of throughout the year. The management of this business was masterly.

Prices during the month of January varied triflingly from 48 cents.

The range of prices during the succeeding month showed a steady improvement, and sales were made at the close of the month at $54\frac{1}{2}$ cents.

In March also, the advance was uninterrupted and pronounced and improved from day to day throughout that month until $69\frac{1}{2}$ cents was realized upon its closing day.

The trade in April recorded a continued improvement in prices, and an unabated demand sent prices up to $73\frac{1}{2}$ cents; from this

point a slight reaction took place, and the month closed with sales at $67\frac{1}{4}$ cents.

During the early part of May sales were made at from $60\frac{1}{2}$ to $67\frac{5}{8}$ cents, showing a tendency immediately after the opening of the month to lower figures, prices on the 29th of May ranging from $56\frac{1}{4}$ to $57\frac{1}{4}$ cents.

June witnessed a recovery from this depression, and prices, although comparatively unsteady during the month, reached as high as $60\frac{1}{2}$ cents.

During the month of July the waiting attitude of the trade gave little importance or prominence to this cereal and there was no special animation in this grain, until at the close of the month, when prices reached 67 cents, closing at 61 and 62 cents.

The unsettled condition of the market revisited the trade in August, and sales ranged during the early part of that month from 57 to $62\frac{3}{8}$ cents. The latter part of the month, however, recorded an active trade at improved values, prices reaching 70 cents. At the close confidence in prices was somewhat shaken, and at its close sales were made at from 63 to $65\frac{1}{8}$ cents.

The Deacon White break came in September, and prices during that month were reduced to 48 cents a bushel, ranging, however, during the month from 48 to 69 cents, closing at $51\frac{3}{8}$ to $54\frac{3}{8}$ cents.

It was evident in October that the views of holders were not sufficiently assured to maintain prices, and they declined to $51\frac{3}{8}$ cents. Nothing but the natural reaction from this depression produced an advance to 57 cents, closing at from $53\frac{3}{4}$ to 56 cents.

No very material change took place in the market in the early part of the month of November, but at its close the speculative short sellers found themselves forced to purchase, which fact had the effect to advance prices and 80 cents per bushel was realized on the 27th. The closing prices of the month were from 70 to $75\frac{1}{4}$ cents.

On December first prices dropped to $46\frac{1}{2}$, and sold on the second of that month at $46\frac{1}{4}$ cents. A temporary recovery took place soon after, owing to the railway blockade which prevented any arrivals of consequence, advancing prices about 13 cents a bushel. When this blockade was loosened receipts rapidly increased, and prices declined, closing on the last day of the year at $39\frac{1}{8}$ to $39\frac{3}{4}$ cents, the closing sales being made at $39\frac{5}{8}$ cents.

The receipts for the year aggregated 72,770,304 bushels,

against 91,387,754 bushels for the year 1890, 79,920,691 bushels for the year 1889 ; and shipments 66,578,300 bushels, against 90,574,379 for 1890, and 83,861,818 bushels for 1889. On page 18 may be found a statement of corn receipts each year for a period of thirty-nine years.

The following table shows the extreme prices in each year for twenty-seven years, indicating the month in which such prices were obtained :

Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865.....	December.....	38 @ 88	January and February.
1866.....	February.....	33½ @ 1 00	November.
1867.....	March.....	56½ @ 1 12	October.
1868.....	December.....	52 @ 1 02½	August.
1869.....	January... ..	44 @ 97½	August.
1870.....	December.....	45 @ 94½	May.
1871.....	December.....	39½ @ 56½	March and May.
1872.....	October.....	29½ @ 48½	May.
1873.....	June.....	27 @ 54½	December.
1874.....	January.....	49 @ 86	September.
1875.....	December.....	45½ @ 76½	May and July.
1876.....	February.....	38½ @ 49	May.
1877.....	March.....	37½ @ 58	April.
1878.. ..	December.....	29½ @ 43½	March.
1879	January.....	29½ @ 49	October.
1880.....	April.....	31½ @ 43½	November.
1881.....	February... ..	35½ @ 76½	October.
1882.....	December.....	49½ @ 81½	July.
1883.....	October.....	46 @ 70	January.
1884.....	December.....	34½ @ 87	September.
1885.....	January.....	34½ @ 49	April and May.
1886.....	October.....	33½ @ 45	July.
1887.....	February.....	33 @ 51½	December.
1888	December.....	33½ @ 60	May.
1889.....	December.....	29½ @ 60	November.
1890.....	February.....	27½ @ 54½	November.
1891.....	December.....	39½ @ 80	November.

The United States exports of this grain for the calendar year aggregated 30,693,505 bushels, against 86,817,220 bushels in 1890. During the fiscal year ending June 30, 1891, we exported 30,768,213 bushels, against 101,973,717 bushels in 1890.

OATS.

This market has been one of more distinctive characteristics than those which marked the year immediately preceding. In consequence of the comparatively small crop of 1890, the trade during the first part of the year was strongly sustained, and prices gathered strength from the very beginning of the year, steadily advancing from 41½ cents until they reached, in the month of

April, $56\frac{1}{2}$ cents per bushel. At this point of time flattering prospects of the coming crop sensibly affected the market, and the general demand slackened. This led to a cautious conduct of operations and a disposition on the part of large shippers to reduce the volume of their holdings, preferring to make sales for future shipments rather than to purchase in advance of orders received from their eastern customers. The speculative traders, as usual, were quick to detect the strong probabilities of the general situation, and acted accordingly. Under these manifest conditions, prices receded, though a fairly good consumptive demand, which was inevitable as a result of the short crop of 1890, prevented any sudden or disastrous decline in values. It was not until the middle of June that prices began to show any decided weakness. During this month sales ranged from $32\frac{1}{4}$ to 45 cents per bushel, closing on the last day of the month at $32\frac{7}{8}$ cents per bushel. In July, this tendency continued with unchecked progress until sales were made at $26\frac{3}{4}$ cents. In August the market acquired renewed strength from a steady receipt of orders from the East and South augmented by local orders of a good volume, together with well-grounded prospects of an export demand materially in excess of that of the preceding year. During the month, prices, for these reasons, improved, so that quite an extensive business was done at from $27\frac{1}{4}$ to 32 cents per bushel, closing on the last day at $27\frac{7}{8}$ to 29 cents. This feature of the trade was carried into the succeeding month, but before the close of the month, disappeared, producing a decline, and sales were made at $26\frac{1}{2}$ cents per bushel. October witnessed a revival of business and prices recovered until sales were made at $30\frac{3}{4}$ cents, although on the fifth of that month the lowest sales of the year were made, viz.: at 26 cents. In November the improvement continued, showing a somewhat brisk inquiry which still further advanced prices to $33\frac{3}{8}$ cents on the 23d. During the closing month of the year, a cautious and steady market prevailed, prices ranging from $30\frac{3}{4}$ to $32\frac{7}{8}$ cents per bushel. Thus closed a year of remarkably good trade in this grain, which afforded a fair profit to all concerned, the well sustained demand enabling the trade to conform to changing conditions without loss, and to adjust itself to the facts, concerning supply and demand, without shock and without diminishing accumulated profits. The farmer was kept in constant touch with controlling conditions, and was not influenced to withhold his

shipments when the demand offered paying rates. In all respects, therefore, the trade of the year in this commodity was one which afforded universal satisfaction, and forcibly illustrates the value of the facilities provided by boards of trade for marketing the farmer's crops.

The following is a statement of the extreme prices each year for twenty-seven years, indicating the month in which such prices were realized:

Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865.....	December.....	25 @66	January.

1890.....	February.....	19 $\frac{1}{4}$ @45	November.
1891.....	October.....	26 @56 $\frac{1}{2}$	April.

The receipts for the year aggregated 74,402,413 bushels, and shipments 68,771,614 bushels, against 75,150,249 bushels and 70,768,222 bushels, respectively, during the year 1890, and 49,901,942 bushels and 50,471,836 bushels, respectively, during 1889.

The quantity in store at the beginning of the year was 388,357 bushels, against 1,707,633 bushels at the corresponding date in 1890.

The price the 2nd day of January, 1890, was 20 $\frac{1}{4}$ cents, and on the corresponding date in 1891, 41 $\frac{3}{8}$ cents per bushel.

The value of the quantity exported during the calendar year was \$2,136,895, against \$4,141,056 in 1890. The quantity ex-

ported during the fiscal year ended June 30th, 1891, was 916,323 against 13,248,516 bushels in 1890.

The number of car loads inspected during the year aggregated 73,311, and the quantity which was received by lake and canal was 2,524,874 bushels.

This grain is most carefully and competently handled by our merchants, which fact accounts in a large degree for our very large receipts on the one hand, and on the other for the large representation in this market of buyers from all parts of the country.

RYE.

Trading in this article, except during the early portion of the year, was of a pronounced character. The situation of the European yield imparted very great firmness to the market and drew the attention of speculators to its opportunities. The strength of, and advance in wheat, increased the number in attendance upon daily sales, so that in the month of April prices went to 90 to 94 cents per bushel, and after a reaction caused by free offerings on the part of holders and dealers in the Northwest, prices in August advanced to \$1.02 to \$1.11½ per bushel. These extreme prices called forth from the farmer every bushel which he could find, and from August to November carloads of rye came into this market on almost every train. Prices by this enormous influx were somewhat, though not seriously, affected, the export demand to a large extent imparting strength to a market which otherwise would have succumbed to, and been demoralized by, a large and sudden supply. From August to November inclusive, there arrived in this market 13,225 carloads of this grain. The total number of carloads arrived during the year aggregated 15,097, as against only 4,533 received during the year immediately preceding. The lowest price for No. 2 in January, was 65 cents per bushel. In February, sales ranged from 71 to 86 cents; in March 94½ cents was realized; in April, sales ranged from 86 to 94 cents per bushel. In the months of May, June and July, the market was on a sliding scale, though the change from the last day of June to July 1st was precipitate, dropping from 78 cents to 63 cents per bushel. There came a scurrying from the short sellers to get the grain, for Europe was asking for it with an urgent desire and wheat was climbing up with strong strides. This situation brought about sales in August at \$1.11½ per bushel on the 17th of that month, which was the topmost

price of the year. During December, sales were made at from 83½ to 92 cents per bushel. It was a great year for rye.

The receipts for the year aggregated 9,164,198 bushels, and shipments 7,572,991 bushels, a record such as has never been even approximated in the history of this market. A good part of the year distillers kept aloof, as prices were high and the stock of whisky left over was large.

The quantity left in store at the close of the year was 572,129 bushels, as against 201,536 bushels at the corresponding time in 1890.

The exports of this grain for the calendar year amounted in value to \$7,473,277, and aggregated in quantity 7,892,529 bushels, as against \$1,025,120 and 1,718,501 bushels for the year 1890. The bulk of the exports in 1891 was made during the latter half of the year, not more than 10,000 bushels being exported from January to June.

The crop of rye raised in the United States in 1891 is estimated by the Department of Agriculture at 33,000,000 bushels.

The important relation which the European yield of this grain sustains to the price of wheat, particularly in this and other surplus wheat producing countries, renders it advisable to insert the following statement showing the rye crop in Europe:

THE RYE CROP OF EUROPE.

[In Winchester bushels.]

Countries.	1887.	1888.	1889.
Austria-Hungary:			
Austria	91,031,114	81,570,776	70,780,870
Hungary	51,295,798	42,195,395	36,789,694
Belgium	18,182,505	15,047,047	18,117,438
Denmark	16,690,138	15,685,483	17,329,012
France	67,182,673	62,957,945	65,622,312
Germany	250,998,981	217,418,451	211,146,589
Ireland	232,686	374,104	406,870
Italy	4,330,791	3,648,835	3,831,956
Netherlands	13,776,063
Portugal	6,437,340
Roumania	10,305,431
Russia in Europe, except Poland	744,192,075	706,646,588	551,525,600
Poland	47,887,247	37,500,763
Servia	2,600,000
Spain	24,803,155
Sweden	22,405,845	19,955,286	20,924,576

The Russian rye crop exceeds that of any other country. Her crop of 1889 was much below the average, but that of 1890 was

large, aggregating, according to the most approved estimate, 719,000,000 bushels, including the crop of Poland. The crop of 1891 is estimated at 520,000,000 bushels, as given by the Liverpool Corn trade News.

Below is a statement which is of special interest in this connection, showing exports and imports of rye of various countries for three years:

IMPORTS AND EXPORTS OF RYE.

Countries.	Exports.			Imports.		
	1887. Bu.	1888. Bu.	1889. Bu.	1887. Bu.	1888. Bu.	1889. Bu.

Spain.....			18,373			

In this country rye is of minor importance, compared with the other cereals. It is grown in the wheat supplying states, particularly, however, in the states of the upper Mississippi and Missouri valleys; its volume of production varies but slightly from year to year. The estimated annual crop from 1885 to 1891 inclusive, is as follows:

	Bushels.
1885.....	28,756,000
1886.....	24,489,000
1887.....	20,693,000
1888.....	28,415,000
1889.....	28,500,000
1890.....	29,000,000
1891.....	33,000,000

The yield of rye is stated officially at 14.4 bushels per acre, or more than 2 bushels above the normal. The yield in 1890 was 11.8 and in 1889, 11.9.

BARLEY.

The receipts of barley for the year aggregated 12,228,480 bushels, and shipments 7,858,108 bushels, as against 19,401,489 bushels and 9,470,971 bushels respectively in 1890. During the year 1889, the receipts aggregated 12,524,538 bushels, and ship-

ments 8,138,109 bushels. The number of car loads received in 1891 was 15,835, by far the larger number inspecting below the grade of No. 2. Most of the receipts of this grain are sold by sample upon arrival, and according to their merits, in distinction from any arbitrary classification. The characteristics of this market offer little or no inducements for speculation, as the volume of its production at no time is beyond the volume of the demand. Receipts are easily absorbed by the local and Eastern trade, unless the quality is of a decidedly inferior and unsound character.

The Department of Agriculture estimates the barley crop of 1891 at 75,000,000 bushels, which is the largest crop of this cereal ever produced in this country, the next largest being that of 1889, viz.: 65,000,000 bushels.

The quantity exported during the fiscal year of 1891 was 973,062 bushels, as against 1,408,311 bushels in 1890.

The chief incidents of the year with respect to this crop are, the large area planted in anticipation of the exclusion of Canadian barley from American markets, and the unusually heavy yield per acre. The average farm value per bushel of this grain is estimated by the Department of Agriculture at 54 cents.

Prices obtained must necessarily be stated as representing many grades, and as covering many conditions, and cannot be definitely quoted as related to qualities which can in exact terms be described. The demand from maltsters throughout the winter season was good at from 70 to 80 cents for choice samples. When consignments from the new crop came upon the market they were disappointing in quality, showing that copious rains in Iowa and Nebraska had inflicted serious damage upon the grain while it was in process of germination. Much of it was sold for feed purposes and brought from 28 to 31 cents per bushel. Soon an export demand came along and prices improved to 40 to 45 cents per bushel. The range of prices for new barley of good to choice quality was from 45 to 68 cents. Common to choice barley sold during the last month of the year at from 45 to 65 cents per bushel.

The quantity in store at the close of the year aggregated 572,129 bushels, as against 201,536 bushels at the corresponding time in 1890.

The exports of this grain from the United States for the calendar year amounted, in value, to \$1,705,503, and aggregated

2,585,318 bushels, as against \$463,891 and 827,818 bushels, respectively, for 1890.

According to the Statistician of the United States Department of Agriculture, the returns of this crop show a decided tendency toward enlargement of the area, consequent upon the prospect of better values. The movement is not confined to any particular district but is general in almost every section where the crop is grown. The record for recent years shows that the money return per acre for barley is greater than that of any other cereal, and yet the home product has not been sufficient to supply the demand for consumption. Competition with barley grown in the Dominion of Canada has been keenly felt, the official record showing an annual importation in some instances, approaching in value \$10,000,000.

FLOUR.

The market in this article retains those distinguishing features which have characterized it in years past. A small proportion only of the flour sold through our commission merchants is included in the receipts at this port. The statistical showing of the flour business in this market does not by any means afford an adequate representation of the business in that article transacted here.

Our receipts during the year aggregated 4,516,617 barrels, and shipments 4,048,129 barrels, as against 4,358,058 barrels and 4,134,586 barrels respectively, in the year 1890.

The value of flour exports from the United States during the calendar year 1891, amounted to \$64,783,861, against \$52,709,105 during 1890, while the value of such exports during the fiscal year ended June 30, 1891, amounted to \$54,705,616, against \$57,036,168 during 1890. The demand, both domestic and foreign, has been gratifying, millers most of the time having their product sold in advance of its manufacture. Prices have been so reasonably low as to give general satisfaction to the poorer classes and to wage earners, while the miller has done a fairly profitable business. The extensive demand for the lower grades for export, has had much to do in the distribution of the family grades of patent flour at low prices. Labor has been well and contentedly employed, and the staff of life has been within easy reach of all. The range of prices throughout the year may be found recorded on page five of the statistical tables of this report, and a statement of the stock of flour by months for a series of years may be seen on page four

of the report. The conservative and honorable character of the trade, which has distinguished it in the past, is fully maintained, and to this market millers can, with absolute confidence, consign their product, while on the other hand, buyers can here transmit their orders in the assurance that they will be faithfully and promptly executed.

The quantity exported during the calendar year aggregated 13,023,692 barrels, against 11,319,456 during the year 1890.

HAY.

The business in hay has been, during the year, one of general satisfaction. The quantity received was greater than that received during the preceding year, it being 192,308 tons, as against 170,562 tons during 1890.

The shipments the year for 1891 aggregated 28,935 tons, as against 19,378 tons in 1890.

The local demand for this product is immense. The Union Stock Yards consumes an enormous amount of this fodder in caring for cattle, calves, hogs, sheep and horses, the receipts of which last year, by that company, numbered 14,304,480. In December there arrived in this market, at the Union Stock Yards, 31,910 car loads of live stock.

When, in addition, we consider the population of this great city and its activity, and also consider its suburban demands, we can easily account for the local consumption of about 160,000 tons of hay for the year just past.

The crop of timothy was a liberal one, except in Michigan and the northern part of Wisconsin, and the quality was excellent, about 75 per cent. grading No. 1. Not so fortunate were the farmers of the Eastern States, as they were favored only with about two-thirds of an average crop. A severe drought in May and late frosts damaged the crop along the Atlantic coast. Late summer rains improved it somewhat, but the season was too far advanced to make a full recovery possible. In the Rocky Mountain region, and on the Pacific coast, the crop was in magnificent condition and the pastures were fat.

The yield of Upland Prairie in Kansas, Missouri and Nebraska, is reported above an average; in Illinois, Ohio and Indiana, better than for years, and fair in Dakota and Iowa. It appears that the acreage in Iowa devoted to hay is diminishing. The farming land

in that enterprising and splendid state is being every year more and more used for the cultivation of the more profitable and aristocratic crops, such as wheat, rye, barley and corn. The government reports the average value per ton at \$8.39, against \$7.74 which represents the average value per ton of the crop of 1890.

Prices for the various grades in this market, during the year, ranged as follows: No. 1 timothy, at \$8.75 to \$16.50; No. 2 timothy, at from \$8.00 to \$15.00; mixed timothy, at from \$7.00 to \$13.50; not graded, at from \$6.00 to \$14.25; threshed, at from \$7.50 to \$10.00; Illinois prairie, at from \$5.00 to \$13.50; Indiana prairie, at from \$5.00 to \$13.00; Kansas prairie, at from \$6.00 to \$15.50; Nebraska prairie, at from \$9.50 to \$11.00; Dakota prairie, at from \$6.50 to \$15.00; Minnesota prairie, at from \$6.00 to \$14.25; Wisconsin prairie, at from \$6.00 to \$14.00; Michigan prairie, \$7.50; Iowa prairie, at from \$4.00 to \$16.50; Missouri prairie, \$11.50; No. 1 prairie, at from \$5.62½ to \$11.50; No. 2 prairie, at \$6.00 to \$8.00; packing hay, at \$4.75 to \$8.50; wheat straw sold at \$4.00 to \$10.00; oats straw, at \$4.00 to \$7.50, and rye straw at \$5.00 to \$12.50.

A statement of prices by months may be examined on page 93.

SEEDS.

The receipts of all kinds of grass seeds for the year aggregated 68,166,231 pounds, against 72,086,100 pounds in 1890, and 84,599,331 pounds in 1889; the shipments amounted to 55,152,971 pounds, against 59,213,036 pounds in 1890, and 84,961,097 pounds in 1889. On page 87 may be seen a statement of prices which prevailed during the year for timothy and clover seed. In the timothy seed market there was little animation at any time of the year, the speculating trade failing to detect any inducement to operate, and sales were made within the narrow limitations of a "hand to mouth" demand. Prices in general were at so low a level, as compared with former seasons, that operators were unwilling to offer seed to any great extent for future delivery. The receipts came fast enough to meet current demands, and no opportunity was presented for sellers to advance prices which, without material variation, continued from the beginning of the year to its close with an uniform monotony. The range on the 1st of January was from \$1.12 to \$1.24 for fair to contract grades, and on the 31st of December from \$1.08 to \$1.24 per bushel. The

highest price of the year for contract grade was \$1.32, and the lowest price \$1.14 per bushel. There was a considerable stock left over from the old crop, which was quite sufficient to meet all requirements, and when seed from the new crop arrived, there was still abundant stock on hand. This brought about a decline in prices and from the month of May to the very close of the year concessions were made to effect sales. The time of greatest depression was during the latter part of October, when the range of prices was from 95c. to \$1.15 per bushel. The recovery from this time was, however, very slight. The quality of the crop was inferior to that of 1890. The market at the close of the year was stupid, holders of stocks in private warehouses being disappointed that the interior trade did not call for supplies. The yield of timothy seed in 1890 was unusually large and of good quality throughout the East, which accounts for the paucity of demand in the Western markets as compared with the expectation of holders. The month of largest receipts was September, when we received 11,624,805 pounds. Most of the arrivals came over the Chicago, Milwaukee & St. Paul, Chicago, Burlington & Quincy, Chicago & North-Western, Chicago, St. Paul & Kansas City, and Chicago, Rock Island & Pacific railways. The shipments were made principally via Chicago & Grand Trunk, Lake Shore & Michigan Southern, Pittsburgh, Cincinnati, Chicago & St. Louis, Baltimore & Ohio, Michigan Central, and New York, Chicago & St. Louis railways.

Chicago maintains its supremacy as the leading seed market of the country.

CLOVER SEED.

The business in clover seed was devoid of special interest. The limited supply left of the old crop prevented dealers from operating beyond the immediate wants of the trade, and there was no speculative feature developed throughout the season. At the beginning of the year prices were higher than those which prevailed at the close of the preceding year. Sales in January were made at from \$4.20 to \$4.60 per bushel for seed of prime quality. During February and March, prices did not materially vary from these quotations, but in April the market had less strength, while in May the highest quotation was \$4.25 per bushel. Throughout the summer the market was dull. In the month of September an improved demand caused an advance, and seed of strictly prime

quality sold at \$4.85, sales ranging from \$4.60 to \$4.85 per bushel. Business in October failed to sustain these prices and the highest grades sold at \$4.50 per bushel. At this period, small receipts and the presence of an export inquiry advanced prices for prime seed to \$4.80, soon followed by sales at \$5.30 per bushel. From the latter part of November to the close of the year the trade paid from \$5.25 to \$5.60 for selected samples.

A statement of the weekly range of prices may be found on page 87. The receipts for the year aggregated 7,857,464 pounds, and shipments 12,217,224 pounds. The months of largest receipts and shipments were those of January, February and March.

FLAX SEED.

Business in this article has been steadily increasing under the plans inaugurated by this board for its extension. A general dissemination of knowledge concerning the cultivation of this seed, the market for its sale and the facilities provided for its classification and storage, brought about a large and active speculative interest in this market, and has in a marked degree stimulated shipments hither.

Our receipts during the year 1891 aggregated 13,229,150 bushels and shipments 9,474,283 bushels, as returned by the Chief Inspector, against 7,296,000 bushels and 6,594,581 bushels, respectively, in 1890. Of the quantity received during the last year, 11,862,400 bushels inspected No. 1. Receipts in car loads, numbered 23,797, arriving principally on the Chicago & North-Western and the Chicago, Milwaukee & St. Paul Railways. The months of largest receipts were September, October, November and December.

No. 1 seed sold in January from \$1.14½ to \$1.23 per bushel. During the months of February, March and April there was little change from this range in quotations, and the trade was without special interest. In May, the market was decidedly weak, owing to prospects of an enormous crop of superior quality, and sales were made at from \$1.12½ to \$1.18¼ per bushel for No. 1, closing on the 29th of that month at \$1.12½. Prices under the influence of these prospects continued to decline, until on the 21st of July sales were made at 99½ cents. A slight recovery in prices took place during the latter part of that month, sales ranging during August from \$1.00 to \$1.08½. In September, prices again declined

and sales were made at 89½ cents on the 28th of that month, closing on the 30th at 95 cents. At this time an export demand visited the market and checked a further decline.

There is no alertness so sensitive and swift as that of commerce. There is no vigilance equal in intensity and constancy to commercial vigilance. With the swiftness of lightning itself are opportunities for commercial advantages discovered, and distance is absolutely annihilated in improving such opportunities. Again is illustrated the advantages of the system of buying and selling for future delivery, and that it brings the prospective demand and supply as ever present factors in the determination of values, prevents the clogging of the channels of trade, and makes congestion in commerce impossible. An unhindered exchange of commodities is the secret of general commercial prosperity, and no system promotes such an exchange so effectually as the system of buying and selling for delivery at a future time. This system distributes goods where and when they are wanted, and insists upon, and maintains, fairness between producer and consumer; it is a servant of the law of supply and demand, and cannot swerve from its fidelity to that law.

Below is a statement of the volume of this crop in the years 1859, 1869, 1879, 1889 and 1891:

States.	1859.	1869.	1879.	1889.	1891.	
	Bu.	Bu.	Bu.	Bu.	Acres.	Bu.
Ohio	242,420	631,894	593,217	145,557	18,498	133,912
Indiana	119,420	401,931	1,419,172	17,556	3,011	26,349
Illinois	8,670	280,043	1,812,438	35,013	4,438	35,013

The U. S. Agricultural Department made last year a special investigation for the purpose of determining the acreage and product of the flax seed crop. The above is the first official statement of a detailed character concerning this product.

The crop is grown almost entirely for seed, the fibre not being utilized to any considerable extent. 97 per cent. of the crop is now grown west of the Mississippi river, whereas in 1880, 65 per cent. was grown east of that river.

LIVE STOCK AND PROVISION TRADE.

As the business of each year passes in review, this trade assumes such immense proportions that Chicago, accustomed as she is to astounding results, is astonished at the enormous increase of her business in live stock and provisions. The business of 1891 in this department of trade exceeded that of 1890. Predictions that this trade is destined to be diverted to other localities have been exploded. Chicago simply presents her record, leaving inferences therefrom to be drawn by others. The deductions which others have already drawn from the record hitherto made, stamp all she has asserted with respect to this trade, as most conservative conclusions.

The number of cattle, calves, hogs, sheep and horses received in Chicago the last year, as elsewhere stated, was 14,304,480. The estimated value of these animals was \$239,434,777. The total value of live stock received in this market during the last twenty-six years was \$3,447,416,225. The number of acres of land covered by the Union Stock Yards is about 300. The average receipts of cattle per day were 10,500 and the average number killed 6,900.

Throughout the year there was a brisk demand for choice cattle. Lean and unattractive creatures were frequently sold at low prices. Owing to the high prices which prevailed for corn, immature animals in large numbers were rushed into the market, and of necessity sold at prices favoring the purchaser.

Prices at the beginning of the year ranged from \$4.70 to \$5.60, but by the middle of April, cattle of good and choice qualities brought from \$5 to \$6.65.

The expectation of a large export trade was not fully realized. There was more than the usual difference in price between cattle of choice styles and common animals, as there came to market some very inferior soft and slop-fed stock, which our best dealers would not touch at any figure. The high standard of the product of our great establishments at the stock yards is insisted upon, and Chicago holds her trade largely because she will not permit, under the temptation of temporary profit, or under any circumstances, any deterioration of the quality of her goods; she desires that the inspection of her product shall be severe and exacting, in order that the reliability of her packing be unquestioned in all the markets of the world.

The market during the summer months was not quite equal to the expectations of the trade. The vast volume of supply from

Texas, as well as from the Northwest, was a surprise to the farmer in our older agricultural states, and many sales of good to choice corn fed beeves sold at from \$4.50 to \$5.50. The market did not recover from the effect of this supply, and for the balance of the year, prices lacked real strength, and gave no promise of improvement. The year was especially favorable to the ranchmen of the Northwest, as excellent pasturage and favorable weather enabled them to send to market fine and well grown stock, whose sleekness attracted a good class of buyers.

The receipts of live hogs for the year numbered 8,600,805 against 7,663,828 in 1890, 5,978,526 in 1889 and 4,921,712 in 1888. The shipments numbered 2,962,514 against 1,985,700 in 1890, 1,786,659 in 1889 and 1,751,829 during 1888.

Only a visit to the Union Stock Yards, and a careful inspection of the unequaled facilities in active operation there can convey an adequate idea of the importance of this business, and of the capital and ability which account for its successful prosecution. All sales are "spot cash."

The receipts of cattle for the year numbered 3,250,359 against 3,484,280 in 1890, 3,023,281 in 1889, 2,611,543 in 1888, 2,382,008 in 1887 and 1,963,000 in 1886. The shipments numbered 1,066,264 against 1,260,309 in 1890, 1,259,971 in 1889, 968,385 in 1888 and 791,483 in 1887.

The receipts of sheep numbered 2,153,537 against 2,182,667 in 1890, 1,832,469 in 1889, 1,515,014 in 1888, 1,360,862 in 1887 and 1,008,790 in 1886. The shipments numbered 688,205 against 929,854 in 1890, 711,315 in 1889, 601,241 in 1888, 445,094 in 1887 and 266,912 in 1886. The number of sheep used for city consumption and for packing in a great variety of forms, was 1,465,332.

The trade was generally satisfactory though at times the country shipper was disappointed in sales. During the opening months of the year corn-fed sheep brought high prices. January sales were made at from \$4.25 to \$5.25 for good to choice muttons. In April and May, prices reached the highest point of the year, viz: \$6.25 to \$6.85. From this time prices began to decline, and shorn sheep sold at from \$4.50 to \$4.75. Later, came an improved demand, and in August sales of woolled sheep were made at from \$5.50 to \$5.90. From this time the inquiry was less urgent, and a decline followed of from 25 to 50 cents per one hundred pounds. As the season advanced the supply increased, and dullness was the

controlling feature of the market for the remainder of the year the decline in prices failing to induce any considerable eastern demand. The year closed with sales at from \$4.75 to \$5.00.

The receipts of horses numbered 94,396, against 101,566 in 1890 and 79,926 in 1889; the shipments aggregated 87,273, against 94,362 in 1890, and 73,311 in 1889. The business in these animals throughout the year was quite satisfactory. There was a constant demand at good prices for choice stock, and most of the supply was promptly taken for eastern markets. The growing demand for fine horses accounts for the large proportion of superior breeds upon our farms and ranches. This has its effect in improved methods of stock farming, since choice stock cannot be raised without well conducted farms, fine pasturage, good buildings, etc. Along with these and similar conditions must come a general advance in agricultural society. There is nothing that quickens the ambition of the farmer in all his industries more than an appreciative market for fine animals, particularly for fine horses of superior breeds, fashioned for speed, style and heavy work.

Through the kindness of Mr. George T. Williams, the Secretary of the Stock Yards, the following table, showing receipts of live stock for each year from 1880 to 1891, inclusive, is submitted:

Year.	Cattle and Calves. Number.	Hogs. Number.	Sheep. Number.	Horses. Number.	Aggregate value.
1880.....	1,382,477	7,059,355	335,810	10,398	\$148,057,626
1881.....	1,547,498	6,474,844	493,624	12,909	183,003,710
1882.....	1,607,495	5,817,504	620,887	13,856	196,670,221
1883.....	1,909,167	5,640,625	749,917	15,255	201,252,772
1884.....	1,870,050	5,351,967	801,630	18,602	187,387,680
1885.....	1,964,018	6,937,535	1,003,598	19,356	173,598,002
1886.....	2,015,100	6,718,761	1,008,790	27,599	166,741,754
1887.....	2,447,867	5,470,852	1,360,862	46,404	176,644,597
1888.....	2,707,629	4,921,712	1,515,014	55,333	182,202,789
1889.....	3,146,249	5,998,526	1,832,469	79,926	203,321,924
1890.....	3,659,305	7,663,828	2,182,667	101,566	231,344,879
1891.....	3,455,742	8,600,805	2,153,537	94,396	239,434,777

In January the market opened at from \$3.35 to \$3.85 per 100 pounds; these prices, without marked change, prevailed throughout the month. Indeed, February sales were within about the same range. In March, an improvement in demand advanced prices, and during the latter portion of that month sales were made at from \$4 to \$5.15; the improvement continued into the month of April until \$5.50 was obtained for plump and heavy styles. The

May market favored the buyer, declining to \$4.25 to \$4.70 at the close of that month. The market in June was an easy going one, recording sales at from \$4.15 to \$4.85, though most of the month ranging from \$4.15 to \$4.60 per 100 pounds. Early in July a strong demand appeared, and prices steadily improved until \$5.85 was readily obtained for hogs of superior weight and quality. The situation in August was less favorable to holders though no marked decline is noted in the returns for that month, but the trade in September did not permit quotations, on an average, at above \$4.40 to \$5.50. The prospect of large supplies brought about a still further decline in October, and from about the 10th of that month sales ranged from \$3.55 to \$4.70. From this time until the close of the year prices constantly were upon the side of buyers, owing to extremely large receipts, including very many light weight animals. High priced corn in the face of a superabundant crop, drove the pigs to market in great numbers, and brought down the price in December to \$3.25 and \$4.00 per 100 pounds.

The mess pork trade was a variable one. The year opened with sales at from \$10.27½ to \$10.60 per barrel, mainly sustained by outside buyers. The local merchants did not have confidence in the opening prices and responded freely to offers from the interior. During the latter part of February, sales ranged from \$9.25 to \$9.52½. Early in March, a strong advance in the price of corn struck something like terror to the heart of the short seller of pork and his eagerness to protect himself resulted in rapidly advancing prices, until \$12.70 was quoted on March 30th.

A reaction came the next day, and on April 1 sales were made at \$12.55. Liberal offerings still further depressed prices, but after a decline of about 30 cents per barrel, confidence returned, and sales were effected at \$12.90, the closing quotation on the last day of April being \$12.75. After \$13.00 had been reached on May 1, a strong influence, believing prices too high, was apparent in the market, and prices began to weaken; this tendency continued and controlled, and on the last days of May, \$10.52½ was all that could be obtained. After a few days of steadiness, prices again weakened and on the 25th of June, \$9.80 was quoted. At this point the foreign buyer was attracted to the Board, sending up prices gradually and strongly to \$11.62½. This demand was soon satisfied, and declining influences resumed their sway up to the closing days of October, save only for a brief period in

September, when Germany removed the embargo upon the long and unjustly abused American hog. The prices then attained could not be maintained. The demand slackened while stocks accumulated. Sales on the last of September were made at \$9.85. During October, the market was very dull, and sales were made as low as \$8.12½ at the close of that month. November brought a slight improvement, but confidence in any substantial advance vanished. During the closing days of the year sales were made at from \$7.40 to \$7.70 per barrel. Total exports from the United States, for the fiscal year, aggregated 81,317,364 pounds, valued at \$4,787,343, against 79,788,868 pounds, valued at \$4,753,488 in 1890.

The receipts of lard for the year aggregated 74,021,945 pounds, against 147,475,267 pounds in 1890 and 99,952,688 pounds in 1889.

The shipments for the year aggregated 362,109,099, against 471,910,128 pounds in 1890 and 395,838,737 pounds in 1889. The exports from the United States for the fiscal year aggregated 498,343,927 pounds, valued at \$34,414,323.00, against 471,033,598 pounds, valued at \$33,455,520.00, in 1890; 158,561,052 pounds were shipped to Great Britain and Ireland, and 106,278,235 to Germany. On page 220 may be seen a statement showing United States exports of hog products to France and Germany from 1875 to 1891, inclusive.

The trade in lard was quite extensive, both speculative and for immediate shipment. Prices throughout the year ranged from \$4.40 to \$7.37½. The year opened with sales at from \$5.80 to \$5.87½, with a declining tendency continuing through February. In March, confidence returned, and during the remainder of the year the course of the trade with respect to prices, corresponded to the general character of the market, in grain and pork as heretofore described. The quotation on the last day of the year was \$6.07½ per hundred pounds.

The trade in short-rib sides was active, both on consumptive and speculative account. Although at times during the year stocks were large, the consumptive demand, which is quickly responsive to any decline in prices, soon relieved the market from surplus holdings. It was at times of an undue accumulation of stocks that the speculative trade was especially animated. Prices in January opened at \$5.02½ to \$5.07½, against \$4.55 to \$4.60 at

the corresponding time in 1890. After selling at an advance of about 20 cents per 100 pounds, prices gradually declined to \$4.67½, which was about the quotation on the last of January.

The demand during February was an indifferent one, and the range of prices in that month was from \$4.42½ and \$4.67½. In March a decided improvement took place, and prices gradually advanced; sales at the close of the month were made at \$5.95. The April market continued in the same general direction; on the 20th \$6.50 was obtained, though prices on the last days of the month dropped to \$6.22½ per 100 pounds. The trade in May was not sufficiently urgent to sustain the prices attained in April, and prices steadily declined until \$5.75 was the highest quotation. There were no marked features to the trade during the month of June. July came in with good prospects, and throughout the month there was a lively trade at from \$5.82½ to \$6.90. In August the trade was fair, but uneventful, and prices declined about 20 cents. The month of September brought a stiff demand, and with stocks somewhat depleted, prices rapidly worked up until \$7.27½ was reached, which was the highest price the year recorded. From this time to the close of the year the market uniformly favored the buyer. The December range of prices was from \$5.52½ to \$5.97½. For ship stores, army rations and for supplying interior southern trade, this article is extensively purchased.

LAKE TRANSPORTATION.

The tonnage carried on the great lakes during 1890 aggregated 30,299,006 tons, comprising 28,295,959 tons in the United States coastwise trade, and 2,003,047 tons in the United States foreign trade. Upon these inland seas more than 9,000,000 tons of iron ore were transported and sent on their way to feed great foundries. Without this great waterway, the present development of our Lake Superior industries would not have been possible.

The census of 1889 states the production of iron ore in the United States at 14,518,041 gross tons. Of this quantity the Lake Superior region contributed 7,519,614 gross tons, or more than was turned out in all other parts of the United States.

This last year, as intimated, the Lake Superior production of iron ore exceeded in quantity 9,000,000 tons.

The tonnage which passed through the Saint Mary's Falls canal during the last season aggregated 8,454,435 tons, and that which

passed through the Detroit river was 21,684,000 tons. The tonnage which passed through the Suez canal during 1890 was 6,890,094 tons. I refer to statement on page 211 showing amount and value of commerce passed through Saint Mary's Falls canal for the season of 1890 and 1891. The valuation of this commerce in 1885 was \$53,413,472.13, and in 1891, \$128,178,208.51.

The number of vessels on the northern lakes June 30, 1891, was 3,600, aggregating a tonnage of 1,061,882 tons. Of these vessels 310 were steamers of more than one thousand net registered tons. The combined fleets of the Atlantic and Gulf coast, the Pacific coast and the western rivers, contained at the same date only 213 steamers of more than one thousand tons register.

The aggregate tonnage of these steamers on the northern lakes was 512,787 tons, exceeding the combined tonnage of this class of vessels in all other ports of the United States by 193,000 tons. On December 31, 1891, there were 89 steel vessels on the lakes with a tonnage of 127,624 tons and valued at about \$14,500,000. Five years ago there were on the great lakes but six steel vessels with a total tonnage of 6,459 tons, and a total valuation of \$694,000.

There are now in process of building in the lake ship-yards forty-five vessels. The deepening and improving of channels on the great lakes have brought about the construction of these enormous lake steamers, which in turn have been the cause of the reduction in lake transportation rates. In 1859 the cost of carrying a bushel of corn from Chicago to Buffalo by water was 15 $\frac{3}{4}$ cents; in 1890 the average rate was 1.9 cents; in 1891 it was carried at one cent per bushel, but during the latter part of the season rates advanced to about 3 cents per bushel.

The discrimination against American commerce, with respect to tonnage passing through the Welland canal, is in violation of the xxvii article of the treaty between Great Britain and the United States known as the Treaty of Washington, and is specially grievous to American citizens in view of the fact that American canals connecting the great lakes are enjoyed by the citizens of Canada on absolutely equal terms with the citizens of the United States. As the grain crops of the country are in a pre-eminent sense a factor in the national prosperity, and as grain constitutes the major part of American cargoes passing through the Welland canal, this discrimination is, in an emphatic sense, a burden upon our commerce.

Again, this violation of the Treaty of Washington increases the cost of coal to the people of the west, or diminishes the earnings of transportation lines carrying the coal, by imposing a toll of ten cents per ton upon shipments passing through this canal consigned to American ports, in excess of the toll upon coal passing through the same canal destined for Canadian territory.

Here is a canal connecting the waters of Lake Erie with those of Lake Ontario, whose privileges are guaranteed by treaty to American and Canadian commerce upon equal terms, so controlled and operated, that American lake transportation lines are compelled to reduce their revenues in order to counteract the effect of Canadian rebates made on commerce passing through the same canal but destined to Canadian ports.

Our grain must be as advantageously placed for export at American seaports as, by Canadian evasion of treaty obligations, it is placed in Montreal or other Canadian ports for ocean shipment.

A further effect of this discrimination is the building up of Montreal and other Canadian ports to the neglect of the commerce of American ports, as it is manifestly to the advantage of the lake carriers to induce shipments of grain destined for European markets to be made via Kingston and Montreal, so that they, the carriers, can obtain the substantial rebate paid by the Dominion of Canada on grain shipped through the Welland canal, provided such grain is trans-shipped to a Canadian intermediate port, in accordance with the new order of the Canadian government issued on the 25th of March, 1891. I cannot believe that the United States government will tolerate the interpretation put upon the Treaty of Washington by the government of the Dominion of Canada. The approaching reciprocity conference is a most opportune occasion, and the attitude of the people of the United States upon the great policy of reciprocity a most fortunate one, for the presentation of these grievances.

The inquiry naturally arises, how long the citizens of the United States shall be compelled to endure the mortification of having American shipments, passing through the Welland canal destined to American ports, placed at a serious disadvantage compared with similar shipments destined to Canadian ports.

The diplomatic service of this country is happily so conducted that the government will insist that in the near future, shipments via the Welland canal shall be made in accordance with the car-

dinal principles of reciprocity as expounded by the Honorable Secretary of State of the United States.

In view of the enormous volume of this commerce, the channels in the line of navigation through the lakes from Duluth to Buffalo should be deepened to from twenty to twenty-two feet. Lake transportation lines during the year were taxed to their utmost capacity, and Chicago as a great distributing center has before her a future that shall astonish those of a generation hence, even as we to-day are amazed at her growth during the last generation.

BOARDS OF TRADE.

The part which boards of trade play in the process of universal enlightenment is profoundly impressive, and their effect upon the development of this country and in sustaining its industries was never more apparent than at this time. Boards of trade marshal the forces of individual capacity, the resources of the field and of the mine; they call forth for the common good the latent forces of mind and of matter, and are constantly creating facilities for the saving of time, for reducing expenses in the distribution of merchandise and minimizing risks of business transactions. They study and solve the problems which a keen and educated competition presents. They take a wide outlook in carrying out their purposes, and keep in view not one market, nor one state, nor one country, but plan and legislate for a world-wide commerce.

There is no doubt that the influence and activities of the great body of merchants represented in the National Board of Trade are intimately and vitally connected with and related to not only every industry in this land, but to all the great marts of trade in the commercial world. More and more the activities, the transactions in commercial life all over the world, are being centralized. The usefulness of the National Board of Trade of the United States can not be denied, neither can be denied the wisdom of its founders, nearly a quarter of a century ago, in anticipating the character of mercantile competition and the education and keenness which enter into the commercial life of to-day.

If the trade and commerce of America are to occupy the same favorable relation to the markets of the old world that every board of trade in this country occupies with reference to our own industries, an international board of trade must be established. In order that the many questions constantly arising out of the conduct of

our commerce with foreign countries be intelligently solved, an international gathering of merchants should be secured, and all subjects of special importance relating to the development of commerce throughout the world should be deliberated upon by such a body.

The influence of an international board of trade would extend far beyond merely commercial circles ; it would reach out into the larger and higher realms of individual and social life, and find expression in splendid charities, in educational endowments, in impulses for noble achievements in individual careers, in quickened ambitions for excellence in science and in all the arts of peace.

We justly extol the splendid significance of the word, "independence." Under the genius of that word, this country sprang into a national existence, and out of it came the highest type of nineteenth century civilization. It has illumined with an imperishable luster many a page of the history of this land. But to-day, in this age, which is pre-eminently commercial and peaceful, there is another word which I would write upon the records of this board, a larger word, a word that contains more of the elements of the highest enlightenment, and that word is "interdependence." Within that word are the secrets of domestic, social and commercial progress. In that word is contained that great doctrine which is addressing itself to this nation as never before, the doctrine of reciprocity. It is along the line of interstate and international commercial relations that we must look for the highest, broadest and most enduring commercial prosperity.

Respectfully,

GEORGE F. STONE,

Secretary.

NOTE.—I am indebted to Howard, Bartels & Co.; United States Government Statistical Departments; United States Signal Service Department; Hon. Horatio N. May, Comptroller of the City of Chicago; London Miller; Vienna International Congress; Charles H. Keep, Secretary Lake Carriers' Association; F. A. Saward, Editor Coal Trade Review; J. K. Hanes, Iron Age; Hon. J. Frank Aldrich, Commissioner of Public Works, City of Chicago, et. al.

REPORT OF THE BOARD OF DIRECTORS.

To the Members of the Board of Trade of the City of Chicago:

GENTLEMEN—Below is submitted the statement of the receipts and expenditures for the fiscal year closed January 4, 1892 :

RECEIPTS.

1909 annual assessments, at \$65.	\$124,085 00
199 transfers, at \$25.	4,975 00
40 Special (6 months) tickets, at \$32.50.	1,300 00
10 Special Messengers' tickets, at \$32.50.	325 00
From Visitors' tickets.	10,517 66
From Messengers' tickets.	1,007 50
From Clerks' tickets.	\$1,865 00
Less Manager Settling Room's salary.	840 00
	1,025 00
From table rents.	6,725 40
From rental of Telephone Room.	169 89
From sales of badges.	74 50
From Board of Trade Clearing House.	7,214 26
From Real Estate Department.	112,281 99
Held in trust for appeal not tried.	15 00
	\$269,716 20
Cash on hand January 6, 1891.	21,969 31
	\$291,685 51

EXPENDITURES.

Interest on bonded debt.	\$65,716 50
Purchase of \$50,000.00 Board of Trade bonds.	51,979 92
Taxes on Real Estate.	23,540 87
Insurance on building, rentals, etc.	10,822 27
Expenses of Real Estate Department.	53,864 93
Office salaries, including Secretary and Assistant.	13,959 32
Salaries, Exchange Hall employees.	6,047 00
A. W. Green, Attorney, legal services.	5,000 00
Other legal expenses.	15 00
Janitor's salary, including scrubbing.	3,860 00
Soap, towels and sundries for lavatory.	500 58
Washing towels.	644 84
Ice.	186 87
Market reports, ticker service.	2,011 50
Market reports, cables.	4,975 98
Market reports, blackboard clerk.	840 00
Market reports, other clerk.	840 00
Chicago Freight Bureau.	4,403 33
Statistical information from New York, Buffalo, Illinois and Michigan Canal, Custom House and Union Stock Yards.	932 03
Telegraphing.	1,434 76
Annual reports and rules.	2,236 07
Stationery, printing and postage.	1,721 14
Newspapers and circulars.	101 40
Special service.	2,636 11
Assessment National Board of Trade.	205 00
Assessment National Transportation Association.	225 50
Delegate to National Transportation Association.	22 85

LXVIII

Balloting expenses.....	\$ 200 00
Furniture	134 05
Repairs	24 65
Insurance on furniture.....	56 00
Rental of telephone.....	125 00
Sundry expenses.....	250 32
Engrossing resolutions...	15 00

Cash on hand and in hands of treasurer, January 5, 1892.....	<u>\$ 32,146 72</u>

The Board of Directors has, during the year, purchased and canceled fifty thousand dollars of the bonds of the board, leaving a total bonded indebtedness of one million three hundred thousand dollars, bearing interest at 5 per centum per annum, payable semi-annually, and due in the year 1933, at the option of the board after 1893. It is recommended that the board's bonded debt, ere many years, be refunded at an interest rate of not over 4 per cent. per annum, thus saving members a very considerable sum. As fast as the debt is reduced the amount insured is also reduced, as, by the express terms of the bonds, the board is obligated to carry an amount of insurance equal to the amount of its bonded debt. The board has now paid two hundred thousand dollars on the bonded debt, reducing the annual interest premium expenditure ten thousand dollars, besides the annual insurance premium expenditure amounting to one thousand two hundred dollars. The result abundantly justifies the additional rate of assessment made to provide for the diminution of the debt. The payment of \$50,000 per year absorbs about \$26 of the \$65 per capita assessment. Whenever we shall have reached the point where it will be wise to refund the debt, the annual assessment will probably not be more than \$40.

Your directors are convinced that the time has not yet arrived when it is advisable to refund and, accordingly, recommend that the present policy of taking up \$50,000 of the bonds annually be continued for another year, and in that view have, upon the report of your Committee on Finance, voted unanimously to fix the assessment for the fiscal year of 1892, at \$65 per annum, or \$25 less than it was for 1888. The cancellation of \$50,000 of our bonds, means the saving of \$2,800 per year in interest and in insurance premiums, and in placing our bonds in such relation to our real

estate valuation that they are among the most desirable securities for investment. After the liquidation of all bills and the purchase of \$50,000 of bonds, as hereinbefore described, the board has on hand in cash \$32,146.72.

That this result shall be properly appreciated, it must be borne in mind that our dues for 1891 were \$5 less than for the preceding year, which means a reduction of revenue for that year of \$9,565. Notwithstanding this reduction, we still show you a balance of cash on hand greater than we begun the year with by \$10,177.41.

Your real estate committee has been unremitting in its efforts for the best management of the Board of Trade building. Its energy and devotion has met with deserved success. Tenants for all the offices in the building were promptly secured at rates higher than those obtained for the year immediately preceding. Our rents for 1890 amounted to \$99,585.46; those for the year now closing to \$112,500.00, showing an increase in revenue from rents of \$12,914.54. We believe this is one of the safest and best conducted buildings for the accommodation of office tenants in the city of Chicago.

The expenditures in this department during the past year were as follows:

Interest on bonds.....	\$65,716 50
Taxes	23,540 87
Insurance	10,822 27
Expenses of the real estate department, including salaries of engineers, firemen, elevator men, janitors, etc...	53,864 93

The difference between the aggregate of these amounts and that of the amount derived from rentals, which difference amounts to \$41,444.57, may be considered as the cost to the Board of Trade for the use of the exchange hall and of all other rooms occupied by the association.

Your directors hope that ere long the association may receive an income from that portion of the building now used for a "Provision Call." The plan has been favorably considered of converting the call room into offices. Your directors are investigating with reference to the cost of these suggested alterations, and will, in due time, submit a definite and detailed report.

The total clearances for the year through the Board of Trade Clearing House amounted to \$104,083,529.67, showing an increase over those of the previous year of \$17,456,372.42.

Your board of directors having come to an agreement with certain principal telegraph companies by which the rights of the asso-

ciation to the unquestioned use of its floor are absolutely secure, the Western Union Telegraph Company, the Postal Telegraph Company and the Milwaukee Telegraph Company, as lessees, are permitted room in the exchange hall for the accommodation of their patrons, members of the Board of Trade. By this agreement the old and reduced rates for telegraphic messages were restored and a very considerable saving of expense was made thereby to the members of the association. The terms of the leases issued to the respective telegraph companies aforesaid amply guarantee to the Board of Trade all its rights, many of which a year ago were, to say the least, but partially secured. During this transitional period from the time the telegraph instruments and appliances were removed from the exchange hall until their restoration, the members of the board, even at no little inconvenience, thoroughly upheld the hands of the directory.

The present membership of the board is 1909.

The number of transfers made during the year was 199, yielding a revenue of \$4,975.

The receipts of grain and of flour, in its grain equivalent, aggregated during the year to 232,000,000 bushels, which are largely in excess of like receipts for any year in the history of the board. The shipments of meats in various forms made during the year aggregated 1,737,000,000 pounds, of pork 287,553 barrels and of lard 363,000,000 pounds.

The various and customary statistical statements will be found in the Secretary's annual review.

During the year your board of directors has been petitioned on many occasions for its influence with reference to proposed appropriations by Congress for the improvement of waterways and deepening harbors along our southern coast. It was found impracticable, if not impossible, for the board of directors to bestow upon each one of these propositions that careful and studious attention which would enable it to make an intelligent report thereon. Hence, to all such appeals your directors have replied that this association, while deeply sympathizing with the South in all her efforts looking to her commercial development, it must, under the necessities of the case, leave with our representatives in Congress the responsibility of passing upon the merits of the several subjects of this character presented for national legislation.

Your directors sent a delegation to represent this body at the

Waterway Convention, held in Detroit on the 17th of December last. It was one of the great objects of this convention to secure an influential petition for an appropriation by the general government for the deepening of all the channels in the lakes to twenty or twenty-one feet. The rapid growth of our lake commerce and the increase in the size of lake craft make it urgently desirable that there shall be no obstruction in any portion of the lakes, or in their connections to vessels drawing twenty-one feet of water.

Your directors also passed resolutions with reference to the Revenue Cutter Service, petitioning the LII Congress to construct an iron or steel propeller to take the place of the present revenue cutter "Andrew Jackson," on Lake Michigan, and also to construct two revenue cutters for the Pacific Coast, and one for Lake Ontario.

Your board of directors recommends a renewal of our relations with the Chicago Freight Bureau. This agency has been of essential service to this association, not only in the equitable adjustment of freight rates affecting the business of the board generally, but in the settlement of individual claims held by our members against railways, many of which could not have been collected by individual effort.

During the year the Freight Bureau has adjusted 354 of these claims, amounting to \$3,129.94, many of them being of a complex character and of long standing. Your directors urge the members to employ the facilities offered by this bureau for the prompt settlement of their claims against railways, and also, for information concerning all phases of the subject of transportation, such as rates, delays in transportation, loss of weight arising from any cause, unjust charges for demurrage, unreasonable delay in switching, inability to obtain shipments ordered to team track, negligence in notifying consignees of the arrival of property, etc. The efficiency of your transportation committee and the intimate knowledge of the commissioner with all phases of the subject of transportation, constitute an assurance that claims filed with the bureau will receive prompt and effective attention. The office of the bureau is No. 71, Board of Trade building.

During the year, twenty-four of our members have died, including Samuel H. McCrea, who was President of the board in 1887.

Respectfully submitted,

By order of, and adopted by, the Board of Directors,

WM. T. BAKER,

President.

REPORT OF THE TREASURER.

To the President and Directors of the Board of Trade of the City of Chicago:

GENTLEMEN—As Treasurer of the Board of Trade of the City of Chicago, from the 6th day of January, 1891, I beg to report that—

I had on hand January 6, 1891	\$ 2,817 80
I have received in sundry deposits from the Secretary of the Board, from January 6, to close of fiscal year, January 4, 1892, inclusive	255,512 67
	<u>\$258,330 47</u>
I have paid 552 checks, drawn by the Secretary and duly countersigned, amounting to.....	\$239,797 55
Leaving a balance of.....	\$ 18,532 92

Respectfully,

ERNEST A. HAMILL, *Treasurer.*

ALL-RAIL THROUGH BUSINESS.

The following statement shows the quantity of flour and grain received at Chicago during 1891, by western railroads, and delivered to connecting lines without passing through a Chicago warehouse, as reported by such roads. These quantities are all included in the general statements of receipts and shipments published herewith, except shipments originating in Milwaukee; these are deducted from the receipts and shipments of Chicago, as shown by the general statements, but are included in this :

Received by the Chicago, Burlington & Quincy Railroad.

FLOUR AND GRAIN.

The following table shows the aggregate annual shipments of flour and all kinds of grain since the incorporation of Chicago, as a city, to the present time, compiled from the most authentic sources :

Year.	Flour. Brls.	Wheat. Bu.	Corn. Bu.	Oats. Bu.	Rye. Bu.	Barley. Bu.	Totals. Flour reduced to bu.
1838		78					78
1839		3,678					3,678
1840		10,000					10,000
1841		40,000					40,000
1842		586,907					586,907
1843		688,967					688,967
1844	6,320	891,894					923,494
1845	13,752	956,860					1,023,620
1846	28,045	1,459,594					1,599,819
1847	32,538	1,974,804	67,135	38,892			2,243,021
1848	45,200	2,160,000	550,460	65,280			3,001,740
1849	51,309	1,936,264	644,848	26,849		31,452	2,895,958
1850	100,871	883,644	262,013	158,084		22,872	1,830,968

GRAIN INSPECTION.

Rules Governing the Inspection of Grain in the City of Chicago, State of Illinois.

The following are the rules adopted by the Board of Railroad and Warehouse Commissioners establishing a proper number and standard of grades for the inspection of grain, as revised by them; the same to take effect on and after the first day of July 1891, in lieu of all rules on the same subject heretofore existing.

RULE I.—WINTER WHEAT.

White winter. No. 1 white winter wheat shall be pure white winter wheat, or red and white mixed, sound, plump and well cleaned.

No. 2 white winter wheat shall be white winter wheat, or red and white mixed, sound and reasonably clean.

No. 3 white winter wheat shall include white winter wheat, or red and white mixed, not clean and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

No. 4 white winter wheat shall include white winter wheat, damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

Long red. No. 1 long red winter wheat shall be pure red winter wheat of the long-berried varieties; sound, plump and well cleaned.

No. 2 long red winter wheat shall be of the same varieties as No. 1; sound and reasonably clean.

Hard winter. Turkish red winter wheat.—The grades of Nos. 1, 2 and 3 hard winter wheat shall correspond with the grades of Nos. 1, 2 and 3 red winter wheat, except that they shall be of the Turkish variety.

In case of mixture of Turkish red winter wheat with red winter wheat it shall be graded according to the quality thereof and classed as hard winter wheat.

Red winter. No. 1 red winter wheat shall be pure red winter wheat of both light and dark colors of the shorter-berried varieties; sound, plump and well cleaned.

No. 2 red winter wheat shall be red winter wheat of both light and dark colors; sound and reasonably clean.

No. 3 red winter wheat shall include red winter wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

No. 4 red winter wheat shall include red winter wheat damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

In case of the mixture of red and white winter wheat it shall be *Mixture*. graded according to the quality thereof and classed as white winter wheat.

No. 1 Colorado wheat shall be sound, plump and well cleaned. *Colorado.*

No. 2 Colorado wheat shall be sound, reasonably clean and of good milling quality.

No. 3 Colorado wheat shall include Colorado wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

RULE II.—SPRING WHEAT.

No. 1 hard spring wheat shall be sound, plump and well cleaned. *Hard spring.*

No. 2 hard spring wheat shall be sound, reasonably clean, and of good milling quality.

No. 1 spring wheat shall be sound, plump and well cleaned. *Spring wheat*

No. 2 spring wheat shall be sound, reasonably clean and of good milling quality.

No. 3 spring wheat shall include all inferior, shrunken, or dirty spring wheat weighing not less than fifty-three pounds to the measured bushel.

No. 4 spring wheat shall include spring wheat damp, musty, grown, badly bleached, or for any cause which renders it unfit for No. 3.

White spring wheat.—The grades of Nos. 1, 2 and 3 white spring wheat shall correspond with the grades of Nos. 1, 2 and 3 spring wheat; except that they shall be of the white variety, or shall contain 5 per cent. or more of such white wheat.

Black Sea and Flinty Pffe wheat shall in no case be inspected higher than No. 2, and rice wheat no higher than No. 4.

RULE II_{II}.—MIXED WHEAT.

The grades of Nos. 2 and 3 mixed wheat shall be equal in quality to the grades Nos. 2 and 3 red winter wheat; except that they shall include mixtures of spring and winter wheat.

RULE III.—CORN.

- Yellow. No. 1 yellow corn shall be yellow, sound, dry, plump and well cleaned.
 No. 2 yellow corn shall be three-fourths yellow, dry, reasonably clean, but not plump enough for No. 1.
 No. 3 yellow corn shall be three-fourths yellow, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.
- White. No. 1 white corn shall be sound, dry and plump, and well cleaned.
 No. 2 white corn shall be seven-eighths white, dry, reasonably clean, but not plump enough for No. 1.
 No. 3 white corn shall be seven-eighths white, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.
- No. 1. No. 1 corn shall be mixed corn of choice quality, sound, dry and well cleaned.
- No. 2. No. 2 corn shall be mixed corn, dry, reasonably clean, but not good enough for No. 1.
- No. 3. No. 3 corn shall be mixed corn, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.
- No. 4. No. 4 corn.—Corn that is badly damaged, damp or very dirty shall be graded no higher than No. 4.
 Corn that is wet or in heating condition shall not be graded.

RULE IV.—OATS.

- White. No. 1 white oats shall be white, sound, clean and reasonably free from other grain.
 No. 2 white oats shall be seven-eighths white, sweet, reasonably clean and reasonably free from other grain.
 No. 3 white oats shall be seven-eighths white, but not sufficiently sound and clean for No. 2.
- No. 1. No. 1 oats shall be mixed oats, sound, clean and reasonably free from other grain.
- No. 2. No. 2 oats shall be sweet, reasonably clean and reasonably free from other grain.
- No. 3. No. 3 oats shall be all oats that are damp, unsound, dirty, or from any other cause unfit for No. 2.
- No. 1. White clipped No. 1 white clipped oats shall be white, sound, clean, reasonably free from other grain, and shall weigh not less than 36 pounds to the measured bushel.
- No. 2. White clipped No. 2 white clipped oats shall be seven-eighths white, sweet, reasonably clean, reasonably free from other grain, and shall weigh not less than 34 pounds to the measured bushel.

RULE V.—RYE.

- No. 1. No. 1 rye shall be sound, plump and well cleaned.
- No. 2. No. 2 rye shall be sound, reasonably clean and reasonably free from other grain.
- No. 3. All rye damp, musty, dirty, or from any cause unfit for No. 2 shall be graded as No. 3.

RULE VI.—BARLEY.

No. 1 barley shall be plump, bright, clean and free from other No. 1. grain.

No. 2 barley shall be sound, of healthy color, not plump enough No. 2. for No. 1, reasonably clean and reasonably free from other grain.

No. 3 barley shall include slightly shrunken and otherwise slightly No. 3. damaged barley not good enough for No. 2.

No. 4 barley shall include all barley fit for malting purposes not No. 4. good enough for No. 3.

No. 5 barley shall include all barley which is badly damaged, or No. 5. from any cause unfit for malting purposes; except that barley which has been chemically treated shall not be graded at all.

The grades of Nos. 1, 2 and 3 Scotch barley shall correspond in Scotch all respects with the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Scotch variety.

The grades of Nos. 1, 2 and 3 Bay Brewing barley shall conform Bay Brewing in all respects to the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Bay Brewing variety grown in the territories and on the Pacific coast.

The grades of Nos. 1, 2 and 3 Chevalier barley shall conform in Chevalier. all respects to the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Chevalier variety grown in the territories and on the Pacific coast.

RULE VII.

The word "new" shall be inserted in each certificate of inspection of a newly harvested crop of oats until the fifteenth day of August; of rye, until the first day of September; of wheat, until the first day of November; of barley, until the first day of May, and of corn until the first day of June of each year.

This change shall be construed as establishing new grades for the time specified to conform to the existing grades of grain in all particulars, except those of condition and the distinction between the new and the old crops.

It is provided, however, that when corn is dry enough for No. 1 or No. 2, it shall not be classed as "new."

RULE VIII.

All grain that is warm, or that is in a heating condition, or is otherwise unfit for warehousing, shall not be graded.

RULE IX.

All inspectors shall make their reasons for grading grain, when necessary, fully known by notations on their books. The weight alone shall not determine the grade.

RULE X.

Each inspector is required to ascertain the weight per measured bushel of each lot of wheat inspected by him and note the same on his book.

ADMINISTRATION AND WAREHOUSE REGISTRATION.

Extracts from the rules adopted by the Railroad and Warehouse Commissioners for the administration of the departments of grain inspection and warehouse registration in the city of Chicago in force from and after November 1, 1889:

“Plugged,”
“Loaded,” or
“Scoured” grain. “The said Chief Inspector, and all persons inspecting grain under his direction, shall in no case make the grade of the grain above that of the poorest quality found in any lot of grain inspected, when it has evidently been “plugged,” or otherwise improperly “loaded,” for the purpose of deception. Wheat which has been subjected to “scouring,” or to some process equivalent thereto, shall not be graded higher than No. 3.”

Attempts at fraud, or interference. “All persons employed in the inspection of grain shall promptly report to the Chief Inspector, in writing, all attempts to defraud the system of grain inspection established by law, and all instances where warehousemen shall deliver, or attempt to deliver, grain of a lower grade than that called for by the warehouse receipt.”

“They shall also, in the same manner, report all attempts of receivers or shippers of grain, or any other person interested therein, to instruct, or in any improper way to influence the action or opinion of any inspector in the discharge of his duty; and the Chief Inspector shall report all such cases to the Commission.”

Extracts from the Law of Illinois, Revised Statutes, Chapter 114, Section 138:

“Any duly authorized Inspector of Grain who shall be guilty of neglect of duty, or who shall knowingly or carelessly inspect or grade any grain improperly, or who shall accept any money or other consideration, directly or indirectly, for any neglect of duty, or the improper performance of any duty, as Inspector of Grain, and any person who shall improperly influence any Inspector of Grain in the performance of his duties as such Inspector, shall be deemed guilty of a misdemeanor, and, on conviction, shall be fined in a sum of not less than \$100, nor more than \$1,000, in the discretion of the Court, or shall be imprisoned in the county jail not less than three, nor more than twelve months, or both, in the discretion of the Court.”

INSPECTION AND WEIGHING RATES.

GRAIN (STATE INSPECTION).

For inspecting grain from cars, per car.....	\$0 25
For inspecting grain from wagons, per load.....	10
For inspecting grain from canal-boats, per M bu.....	40
For inspecting grain to vessels, per M bu.....	50
For inspecting grain to cars, in bulk, per car.....	35
For inspecting grain to teams, per car.....	35
For inspecting grain to teams, per load.....	10
For inspecting grain in sacks, per bu.....	00¼

P. BIRD PRICE, *Chief Inspector.**Railroad and warehouse commissioners, in charge of grain inspection:*

ISAAC N. PHILLIPS,

JOHN R. WHEELER,

J. C. WILLIS.

Registrar:

J. M. TURNBULL, Room 808, 218 La Salle Street.

Committee of appeals on grain inspection:

THOS. H. FOSTER,

W. N. BRAINARD,

J. MANSFIELD.

FLOUR.

For inspecting flour, per brl., or its equivalent in sacks.....	\$0 02
---	--------

R. W. RATHBORNE, *Chief Inspector.*

PROVISIONS.

Sampling, including re-packing and coopering:

For inspecting beef and pork—for the first five barrels, per brl.....	\$0 80
For inspecting beef and pork—for each additional brl.....	25
For inspecting S. P. meats—for the first five tierces, per tc.....	1 00
For inspecting S. P. meats—for each additional tc.....	25
For inspecting boxed meats—for the first five boxes, per box.....	1 00
For inspecting boxed meats—for each additional box.....	50

In case the whole of the lot is inspected, not including labor and coopering:

For inspecting beef and pork, per brl.....	\$0 10
For inspecting S. P. meats—in lots of fifty tierces or more, per tc.....	12½
For inspecting S. P. meats—in lots of less than fifty tierces, per tc.....	15
For inspecting S. P. meats—in lots of one hundred tierces or more, per tc.....	10
For inspecting bulk or boxed meats—in car-load lots or more, per M lbs..	15
For inspecting lard—in lots of one hundred tierces or more, per tc.....	04
For inspecting tallow and grease, per tc.....	05

I. T. SUNDERLAND, *Chief Inspector.*

FLAXSEED.

For inspecting flaxseed received in bulk—for each car-load of one grade..	\$0 75
For inspecting flaxseed received in bulk—where two or more grades are found in the same car—for each grade.....	50
For each one thousand bushels from elevator or warehouse to lake transportation.....	75
For each two-bushel bag.....	00½
For each four-bushel bag.....	01
For each wagon-load*.....	16⅔

S. H. STEVENS, *Chief Inspector.*

GRAIN BY SAMPLE.

For inspecting grain by sample, per car.....	\$0 30
For inspecting grain from warehouse, per M bu.....	25

H. B. CWEN,	} <i>Grain Samplers.</i>
WM. McDOUGALL,	
W. I. CRUIKSHANK,	

WEIGHING CHARGES.

Lard and grease, not including breaking down and re-piling, in lots of one hundred packages or more, per package.....	\$0 04
For the labor of breaking down and re-piling, to be refunded if not re-piled.	03
Tallow, in half hogsheads or smaller packages, per package.....	05
Tallow, in hogsheads, per package.....	10
Bulk meats, not including labor, per M lbs.....	10
For stripping lard or grease at regular warehouses—not less than five packages—per package.....	50
Grain, by cargo, from elevator to vessels, per M bu.....	20
Grain, from canal-boats, per boat-load.....	1 00
Grain in bulk, at regular transfer stations, per car-load.....	30
Flaxseed in bags or bulk, per car, not including handling labor.....	30

Handled at the expense of the weigher :

Grain, seed, beans, potatoes and similar articles in bags, per bag.....	02
Sugar, in hogsheads and boxes, per 100 lbs.....	02
Salt, in sacks, per 100 lbs.....	02
Sugar, salt, dried fruit and similar articles, in barrels, per brl.....	04
Butter and lard, in kegs, per package.....	04
Wool, in lots of not less than 50 bales, per bale.....	08
Wool, in lots of 50 bales or more, per bale.....	07
Broom-corn, in lots of less than 50 bales, per bale.....	07
Broom-corn, in lots of 50 bales or more, per bale.....	06
Dressed hogs, each..	02
Pig iron and lead, per 100 lbs.....	02
Coal and salt, per ton.....	05

I. T. SUNDERLAND, *Weigher of packing-house products.*JOHN WALKER, *Weigher of other commodities.*JOHN PAX, *Sampler of grass seed.*

* Four wagon-loads to be counted as equal to 1 car-load.

COMMISSIONS.

The following rates of commission and brokerage, being just and reasonable, are hereby established as the minimum charges which shall be made for the transaction of the business hereinafter specified, by members of this Association:

For receiving, selling and accounting for the following kinds of property—

For the sale of property on consignment:

Wheat, rye and barley, by car-load lots, in store, free on board cars or vessels, on track, delivered or to be shipped from any other point.....	per bu. \$0 01
Corn, by car-load lots, in store.....	“ 00½
For selling corn, otherwise than in store.....	“ 00½
Oats, by car-load lots.....	“ 00½
For selling canal-boat loads of grain in store, or afloat, or free on board vessels.....	“ 00½
Flaxseed, in bulk.....	1 per cent.
Flaxseed, in bags.....	1½ “
Clover seed, in car-load lots.....	1 “
Clover seed, in less than car-load lots.....	1½ “
Timothy seed.....	1½ “
All other seeds, in bulk.....	1½ “
Dressed hogs, in car-load lots.....	1½ “
Dressed hogs, in less than car-load lots.....	1½@2½ “
Bran, shorts and millstuffs.....	\$3 50 per car.
Corn-meal.....	5 00 “
Broom-corn.....	00¼ per lb

For the purchase and shipment of property:

Rye and barley, to be shipped by vessel cargo.....	per bu. \$0 00½
Other grain, to be shipped by vessel cargo.....	“ 00¼
All grain, to be shipped by rail.....	“ 00½
Lard, mess pork and other meats.....	½ of 1 per cent.

For the purchase and sale of property in the Chicago market:

Grain of all kinds, in lots of 1,000 and 5,000 bushels.....	per bu. \$0 00½
Lard, in lots of 50 and 250 tierces.....	per tce. 05
Mess pork, in lots of 50 and 250 barrels.....	per brl. 05
Other meats, in lots of 25,000 and 50,000 pounds.....	per M lbs. 25

In cases where the transaction is made for members of the Board one-half the last-named schedule may be charged.

Brokerage charges under limitations:

On all kinds of grain.....	per M bu. \$0 12½
On lard.....	per tce. 00½
On mess pork.....	per brl. 00½
On other meats.....	per M lbs. 02½

PUBLISHED RATES OF STORAGE ON GRAIN.

On grain received in bulk :	In cents per bushel.
If inspected in good condition when received—	
For the first ten days, or part thereof	$\frac{3}{4}$
For each additional ten days, or part thereof.....	$\frac{1}{3}$
(After December 1, 1891, upon grain in good condition, storage will be at the above rate until four cents per bushel shall have accrued ; after which time no additional storage will be charged until May 1, 1892.)	
If condemned as unmerchantable when received—	
For the first ten days, or part thereof	2
For each additional five days, or part thereof.....	$\frac{1}{2}$

No grain will be received in store until it has been inspected and graded by authorized inspectors unless by special agreement.

NUMBER OF CATTLE SLAUGHTERED AT CHICAGO

*For the dressed beef, packing, canning and city trade for the past five years,
ending March 1, 1891.*

Firms.	1890-91. No.	1889-90. No.	1888-9. No.	1887-8. No.	1886-7. No.
Armour & Co.	714,000	597,941	572,014	504,232	402,886
Eastland & Duddleston			15,000	14,500	14,000
Fairbank Canning Co.	561,262	531,443	468,498	433,563	344,487
Hammond, Geo. H. & Co.	*303,701	*263,841	*225,400	*209,150	*181,000
Hately, J. C.	40,500	34,449	11,700		
Hess Bros	45,000	43,000	23,100	20,700	20,000
Miller, Hendricks & Co.			12,000	29,000	37,253
Libby, McNeil & Libby	221,763	141,699	180,549	125,922	109,645
Shoeneman & Co.			24,600	32,000	35,000
Swift & Co.	772,107	568,812	487,766	583,924	453,931
Small houses	22,000	25,000	30,000	10,000	30,000
Totals	2,680,333	2,206,185	2,050,627	1,963,051	1,608,202

* Slaughtered at Hammond, Ind., and partially reported in the shipments of live.

It is impossible to present the number of cattle slaughtered for each department of trade. Messrs. Swift & Co. and G. H. Hammond & Co. confine their operations to shipping in carcass, while Messrs. Armour & Co. and the Fairbank Canning Co. extend their business to all departments, and Messrs. Libby, McNeil & Libby restrict their operations to the packing, canning and city trade branches.

There has always been some doubt as to the number of cattle packed at Chicago—in most cases the number reported exceeding the net receipts. But it must be understood that the returns of the slaughterers include calves, of which they kill about 100,000 annually. It must also be understood that the slaughtering at Hammond, Ind., includes cattle which may be received by railroad from other sections, and which do not pass through the yards at Chicago, and also that some cattle received at Chicago, consigned direct to packers, may not be included in the arrivals.

STOCKS OF PROVISIONS IN CHICAGO,

PROOF SPIRITS (HIGHWINES).

The following table indicates the current prices of pure proof spirits. The sale of highwines is almost obsolete, proof spirits taking their place in the demand from rectifiers. At other distilling points there is still a slight demand for highwines, and the price is considered a basis for all kinds of distilled spirits and their manufactured product; such markets quote the prices of highwines, while Chicago quotes proof spirits, a product of highwines.

Week ending		Price per gallon.	Week ending.		Price per gallon.

IMPORTS OF MERCHANDISE INTO THE UNITED STATES.

The following table exhibits the value of imports of merchandise by commodities during 1889, 1890 and 1891—the years ending June 30.

Commodities.	1891.	1890.	1889.
Sugar and molasses—sugar.....\$105,797,094			
Molasses—Melada and syrup.....2,659,172			
	\$108,456,266	\$101,293,826	\$93,334,538
Wool—raw.....\$ 18,231,372			
manufactures of.....41,060,080			
	59,291,452	71,846,515	70,539,457
Silks—raw.....\$ 19,077,366			
manufactures of.....37,880,857			
	56,958,223	63,018,241	54,455,995
Coffee.....96,123,777		78,267,432	74,724,882
Iron and steel, and manufactures of.....20,227,612		23,167,065	22,662,847
Chemicals, drugs, medicines, dyes, etc.....45,003,926		39,594,136	37,620,953
Cotton—raw.....\$ 2,825,004			
manufactures of.....28,511,346			
	31,346,350	30,974,128	27,616,923
Hides and skins, other than furs.....27,935,089		21,881,886	25,127,750
Tin, and manufactures of.....43,723,935		27,827,059	28,237,148
Flax—raw.....\$ 1,656,779			
manufactures of.....17,551,993			
	19,208,772	18,970,539	18,261,031
Fruits and nuts.....25,983,136		20,766,471	19,746,417
Tea.....13,828,993		12,317,493	12,435,533
India rubber, gutta percha, and manufactures of...18,375,449		15,222,159	12,723,358
Breadstuffs and farinaceous food.....5,028,296		7,142,998	8,971,722
Woods, and manufactures of.....17,983,669		15,427,560	15,674,602
Leathers, and manufactures of.....12,683,303		12,436,080	11,296,322
Jute and other grasses—raw.....\$ 11,327,125			
manufactures of.....6,386,176			
	17,713,301	20,892,443	16,985,970
Wine, spirits and cordials.....12,217,175		11,074,156	9,634,859
Tobacco, and manufactures of.....16,762,862		21,710,454	14,610,990
Provisions, including eggs and fish.....8,339,056		9,376,061	9,002,724
Earthen, stone, and china ware.....8,381,388		7,030,301	6,476,199
Fancy goods, including perfumeries and cosmetics...7,325,473		7,626,378	6,661,532
Furs, dressed and undressed.....9,832,212		7,553,816	7,417,755
Glass, and glassware.....8,364,312		7,352,513	7,712,389
Precious stones.....13,266,468		12,383,335	11,029,138
Articles exported and returned.....4,466,494		4,231,952	5,857,788
Paper materials.....6,920,937		7,075,804	5,925,047
Hemp, and manufactures of.....8,035,545		8,402,384	10,927,127
Buttons, and button materials.....2,096,411		3,207,128	3,252,406
Animals, living.....4,945,365		6,766,932	7,224,304
Books, and other publications.....4,225,275		3,994,070	4,068,957
Straw and palmleaf, and manufactures of.....3,711,753		3,398,657	4,197,077
Paintings, photographs and statuary.....2,409,017		2,196,500	1,646,235
Oils of all kinds.....3,901,894		3,359,953	3,128,502
Watches and watch materials.....1,984,414		1,674,878	1,662,118
Hair, and manufactures of.....2,405,370		3,026,566	2,585,941
Barks, medicinal and other.....1,824,467		1,660,927	1,455,795
Spices.....3,151,833		3,223,071	3,376,973
Metals, and manufactures of (not otherwise stated)...7,222,670		4,234,082	4,324,669
Household effects of immigrants and others.....2,915,720		2,735,099	2,732,972
Coal.....3,586,632		3,087,760	3,929,245
Paper, and manufactures of.....3,031,512		2,816,860	2,542,383
Dye-woods in sticks.....2,010,435		1,725,167	1,665,452
Seeds.....3,265,516		4,089,814	5,097,223
Salt.....928,889		950,925	943,131
Musical instruments.....1,444,342		1,703,129	1,722,380
Paints of all kinds.....1,439,127		1,343,457	1,294,811

IMPORTS OF MERCHANDISE.—CONTINUED.

Commodities.	1891.	1890.	1889.
Bristles	\$1,357,938	\$1,286,219	\$1,284,724
Cocoa	2,817,168	2,312,781	2,142,061

REMARKS.—Included in the above exports of beef for 1891 are 194,045,638 lbs. of fresh beef, valued at \$15,322,054, of which 192,456,458 lbs. were shipped to Great Britain and Ireland. There were also exported 199,395 lbs. of fresh mutton, valued at \$18,957; and preserved meats in tin cans of the value of \$9,008,906. Of the total exports \$765,227,738 worth was carried in foreign vessels, and but \$76,925,626 in value transported in American craft. In the United States the values of exports of domestic merchandise are their values as given by the exporters at the time of exportation.

NATIONALITY OF VESSELS.

Statement exhibiting the principal nationality of vessels entered at the ports of the United States, and showing the relative decline of American tonnage engaged in the foreign commerce of the country since 1860.

NOTE.—Prior to the year 1820 no official records of the arrival of alien passengers were kept. It is estimated, however, that the total number arriving in the United States from the foundation of the government to the year 1820 was 250,000.

Up to the year 1856 no record was kept of immigrants in distinction from the arrival of alien passengers.

Of the number of immigrants arrived during the year ending June 30th, 1891, 54,024 came from England and Wales, 55,706 from Ireland, 12,557 from Scotland, 113,554 from Germany, 76,055 from Italy, 69,642 from Russia, 36,880 from Sweden, 12,568 from Norway, 2,836 from China and 71,042 from Austria-Hungary.

The total number of European emigrants for the last fiscal year was 543,985.

Of the total number of immigrants for the year 354,059 were males and 206,260 were females.

The year ending June 30th, 1882, was the year of the greatest immigration.

Owing to the absence of law for the collection of statistics in relation to immigrants by railroads, those from the British North American possessions and from Mexico are not included in the above table.

The law under which immigration statistics are collected was passed in 1821, when our foreign commerce in merchandise amounted to only \$109,000,000, and before the first railway was constructed. At that period there was no intercourse or interchange of commodities by land with border people save only by an occasional adventurer. It is high time that Congress provided by law for collecting statistics of immigration by railways.

UNITED KINGDOM.

Production and imports of wheat and flour; also the population, during the cereal years ending August 31, from 1863 to 1892.

(Compiled from Beerbohm's tables; also from data furnished by Mr. John Jones, the reporter of foreign markets for this Board, resident in London.)

Cereal Year.	Acreage June 25, including the islands.	Estimated yield per acre.	Total home pro-duce.	Total home produce, less 2½ for seed.	Imports.	Exports.	Net Imports.	Total available for home consumption (not including seed).	Population June 25, each year.	Supposed requirements for home consumption (not including seed) at the rate of 5½ bus. per head.	Averages per quarter.

NOTE.—In the above table the estimated yield per acre was, up to 1884, that of the best authorities, helped by a calculation of the results in each season; in the following years the Government figures have been adopted. In estimating the rate of consumption the conventional rate of 5½ bushels per capita is taken up to 1880-81, since when the rate of 5.6 bushels per capita has been assumed, such being considered nearer the actual consumption

GRAIN CROPS IN ILLINOIS.

Acres, estimated yield, and estimated home value of the crops of wheat, corn, oats, rye and barley in the State of Illinois for the years 1860 to 1891, inclusive, as reported by the State Agricultural Department.

NOTE.—Up to 1850 only the aggregate valuations in the several counties were reported to the State officers, and from 1852 to 1857, inclusive, a few counties returned only the aggregates; hence the details of real estate and personal property valuations are not complete for those years. In 1867 and 1868 the details of valuation are not entirely correct, owing to changes by the operation of the equalization law. Since 1868 the valuations are as equalized. The total valuations in each of the several years are correct and official.

The valuations for 1873 as equalized are largely in excess of any previous year. In 1874 some changes were made in the manner of equalizing the assessments, resulting in reducing all the valuations, especially those of railroad property.

The State debt, as noted, represents it as it stood on the 1st of January in each of the several years to 1869; in 1869 and 1870, as it stood December 1; in 1871, as it stood December 31; from 1872 to 1879, as it stood December 1.

CHICAGO REAL ESTATE AND PERSONAL PROPERTY.

Valuation for purposes of taxation, also the taxes levied, and the public debt of the city in each year since 1851.

NOTE.—From 1851 to 1882, inclusive, a lamp tax of half a mill to two mills was levied on certain portions of the city, and is included in the above total tax. The city debt as noted represents it as it stood on February 10 in 1852 to 1854, inclusive; on February 1 in 1855 to 1861, inclusive; on April 1 in 1862 to 1874, inclusive; and on Dec. 31, since 1874. Valuations for 1875 to 1883, inclusive, are by the county assessment, as equalized by the State Board of Equalization, and in some of these years do not include railroad property. The city tax on railroad property for 1882 and 1883, something over \$100,000 for each year, is not included in the above total tax. The above figures for 1889 include the districts annexed to the city of Chicago July 15 of that year.

CANAL STATISTICS (OFFICIAL).

The following statement shows the expenses of repairs, renewals, etc.; also the tolls collected, with the dates of the opening and closing of the Illinois and Michigan Canal, from 1849 to 1891, inclusive:

	Ordinary repairs.	Extra'rd'y repairs, renewals, and hyd. works.	Gross expenses.	Tolls.	Canal opened.	Canal closed.	No. of days open.

NOTES.—The statistics for 1860, 1870 and 1880 are derived from the United States census. The statistics for the remaining years, except for 1887, are compiled from data collected and estimates made by Mr. Frederick E. Savard, editor of the Coal Trade Journal of New York, and by H. V. & H. W. Poor, and those for 1887 are furnished by the United States Geological Survey.
According to the compendium of the census for 1860, the value of the coal mined in the United States in 1850 was \$7,173,750.
